Dependability Metrics

This book constitutes the refereed proceedings of the Second International Conference on Advances in Communication, Network, and Computing, CNC 2011, held in Bangalore, India, in March 2011. The 41 revised full papers, presented together with 50 short papers and 39 poster papers, were carefully reviewed and selected for inclusion in the book. The papers feature current research in the field of Information Technology, Networks, Computational Engineering, Computer and Telecommunication Technology, ranging from theoretical and methodological issues to advanced applications.

Ideal for PET and FCE preparation Packed full of useful study extras, the Cambridge Learner's Dictionary helps you on your way to becoming a confident, natural English speaker. With clear definitions, written especially for intermediate level students, and thousands of examples that put the language into context, this dictionary is an invaluable companion, whether you are learning English for work or pleasure, or preparing for an exam. The best bits of the dictionary * NEW! Improved and expanded study pages include the innovative 'Talk' section, focussing on conversation, and how people really speak in day-to-day situations. * NEW! Word Partner boxes show how words are used together, helping you develop natural sounding English. * NEW! Special 'new words' section focuses on the latest words to enter the English language, ensuring that the language you learn is always up to date. * NEW! Thesaurus boxes make your English sound more natural by providing alternatives to over-used words, helping you to widen your vocabulary. * Learner Error notes taken from the Cambridge Learner Corpus - based on real student errors from Cambridge ESOL papers - help you to avoid typical mistakes. The Cambridge Learner's Dictionary CD-ROM includes the whole dictionary in a handy searchable format and much more, too! You can listen to every word in British and American English - and even record yourself for comparison. The best bits of the CD-ROM * UNIQUE! SMART thesaurus helps build vocabulary and allows you to create topic-related word lists at the click of a button. * QUICKfind, a mini pop-up version of the dictionary, lets you look up words as you work with no effort. * Hundreds of interactive vocabulary practice exercises - to

use on-screen, or print out for classroom use - help you to monitor your progress.

Building State Capability

WITH AN INTRODUCTION BY CARYL PHILLIPS In 1945, Rick Braithwaite, a smart, highly educated ex-RAF pilot, looks for a job in British engineering. He is deeply shocked to realise that, as a black man from British Guiana, no one will employ him because of the colour of his skin. In desperation he turns to teaching, taking a job in a tough East End school, and left to govern a class of unruly teenagers. With no experience or guidance, Braithwaite attempts to instill discipline, confound prejudice and ultimately, to teach.

FROM THE PUBLISHER: It is very rightly said that if we teach today as we taught yesterday, then we rob our children of tomorrow. With this vision, CISCE has yet again updated and released its curriculum for the upcoming Academic Year. With all the refreshing changes and updates, the way ahead looks exciting for students and teachers alike! We at Oswaal Books, are also extremely upbeat about the recent changes. We have made every possible effort to incorporate all these changes in our books for the coming Academic Year. Questions incorporated in this book follow the latest syllabus, pattern and marking guidelines of the Council to guide the candidates to answer with precision. This will help students to get familiar with the examination techniques. These Question banks are available for all important subjects like Maths, English Paper 1 & 2, Hindi, Physics, Chemistry, Biology, History, Computer Science & Economics. We at Oswaal Books never try to teach our readers. We on the other hand, provide them the conditions in which

This exciting new book explores the role of government, politics, and policy in American lives. Full of real life applications and scenarios, this text encourages and enables political thinking. The second edition has been updated to include recent developments in U.S. politics and government. This includes the description and analysis of the 2016 elections as well as the early Trump administration. Chapters have expanded coverage of immigration policy, environmental policy, economic policy, and global affairs (including counterterrorism policy). The text also includes analysis of racial issues in contemporary American politics and law. It also addresses questions about the state of the economy, jobs, and wages. Hyperlinks and URLs provide "deeper dives" into various topics and examples of comparative politics.

Lakhmir Singh's Science for Class 8

The volume, complexity, and irregularity of computational data in modern algorithms and simulations necessitates an unorthodox approach to computing. Understanding the facets and possibilities of soft computing algorithms is necessary for the accurate and timely processing of complex data. Research Advances in the Integration of Big Data and Smart Computing builds on the available literature in the realm of Big Data while providing further research opportunities in this dynamic field. This publication provides the resources necessary for technology developers, scientists, and policymakers to adopt and implement new paradigms in computational methods across the globe. The chapters in this publication advance the body of knowledge on soft computing techniques through topics such as transmission control protocol for mobile ad hoc

networks, feature extraction, comparative analysis of filtering techniques, big data in economic policy, and advanced dimensionality reduction methods.

Parliamentary Debates (Hansard).

Measures of Personality and Social Psychological Constructs assists researchers and practitioners by identifying and reviewing the best scales/measures for a variety of constructs. Each chapter discusses test validity, reliability, and utility. Authors have focused on the most often used and cited scales/measures, with a particular emphasis on those published in recent years. Each scale is identified and described, the sample on which it was developed is summarized, and reliability and validity data are presented, followed by presentation of the scale, in full or in part, where such permission has been obtained. Measures fall into five broad groups. The emotional disposition section reviews measures of general affective tendencies, and/or cognitive dispositions closely linked to emotion. These measures include hope and optimism, anger and hostility, life satisfaction, self-esteem, confidence, and affect dimensions. Emotion regulation scales go beyond general dispositions to measure factors that may contribute to understanding and managing emotions. These measures include alexithymia, empathy, resiliency, coping, sensation seeking, and ability and trait emotional intelligence. The interpersonal styles section introduces some traditional social-psychological themes in the context of personality assessment. These measures include adult

Read Book 1995 Icse English Language Paper

attachment, concerns with public image and social evaluation, and forgiveness. The vices and virtues section reflects adherence to moral standards as an individual characteristic shaped by sociocultural influences and personality. These measures include values and moral personality, religiosity, dark personalities (Machiavellianism, narcissism, and subclinical psychopathy), and perfectionism. The sociocultural interaction and conflict section addresses relationships between different groups and associated attitudes. These measures include cross-cultural values, personality and beliefs, intergroup contact, stereotyping and prejudice, attitudes towards sexual orientation, and personality across cultures. Encompasses 25 different areas of psychology research Each scale has validity, reliability info, info on test bias, etc Multiple scales discussed for each construct Discussion of which scales are appropriate in which circumstances and to what populations Examples of scales included

Some of the key benefits of studying from Oswaal Question Banks are: • Strictly based on the latest CISCE Reduced Curriculum issued for ICSE for Academic Year 2020-2021 • Previous Years' Board Questions for in depth study • Handwritten Toppers' Answers • Answering Tips and Examiner's Comments • Answers strictly as per the ICSE Marking Scheme • All Typology of Questions included for exam-oriented study • Revision Notes for comprehensive study • 'Mind Maps' in each

chapter for making learning simple. • Suggested videos at the end of each chapter for a Digital Learning Experience

SCAM 2003

Provides communication technologies, intelligent technologies, and quality educational pedagogy for advancing distance education for both teaching and learning.

Journal of Object-oriented Programming

We introduce a lazy XSLT interpreter that provides random access to the transformation result. This allows efficient pipelining of transformation sequences. Nodes of the result tree are computed only upon initial access. As these computations have limited fan-in, sparse output coverage propagates backwards through the pipeline. In comparative measurements with traditional eager implementations, our approach is on par for complete coverage and excels as coverage becomes sparser. In contrast to eager evaluation, lazy evaluation also admits infinite intermediate results, thus extending the design space for transformation sequences. To demonstrate that lazy evaluation preserves the semantics of XSLT, we reduce XSLT to the lambda calculus via a functional

language. While this is possible for all languages, most imperative languages cannot profit from the confluence of lambda as only one reduction applies at a time.

ICSE Art of Effective English Writing for Classes IX-X (2021 Edition)

A complete course in ISC English for classes XI-XII is covering the syllabus prescribed by the council for the Indian School Certificate examinations, New Delhi for the ISC examinations in and after 2013.

Education World

Introduction : the "long voyage of discovery" -- The big stuck in state capability -- Looking like a state : the seduction of isomorphic mimicry -- Premature load bearing : doing too much too soon -- Capability for policy implementation -- What type of organization capability is needed? -- The challenge of building (real) state capability for implementation -- Doing problem-driven work -- The searchframe : doing experimental iterations -- Managing your authorizing environment -- Building state capability at scale through groups.

Directory of Indian Publishers

This book provides a concise yet comprehensive overview of computer and Internet security, suitable for a one-term introductory course for junior/senior

Read Book 1995 Icse English Language Paper

undergrad or first-year graduate students. It is also suitable for self-study by anyone seeking a solid footing in security – including software developers and computing professionals, technical managers and government staff. An overriding focus is on brevity, without sacrificing breadth of core topics or technical detail within them. The aim is to enable a broad understanding in roughly 350 pages. Further prioritization is supported by designating as optional selected content within this. Fundamental academic concepts are reinforced by specifics and examples, and related to applied problems and real-world incidents. The first chapter provides a gentle overview and 20 design principles for security. The ten chapters that follow provide a framework for understanding computer and Internet security. They regularly refer back to the principles, with supporting examples. These principles are the conceptual counterparts of security-related error patterns that have been recurring in software and system designs for over 50 years. The book is “elementary” in that it assumes no background in security, but unlike “soft” high-level texts it does not avoid low-level details, instead it selectively dives into fine points for exemplary topics to concretely illustrate concepts and principles. The book is rigorous in the sense of being technically sound, but avoids both mathematical proofs and lengthy source-code examples that typically make books inaccessible to general audiences. Knowledge of elementary operating system and networking concepts is helpful, but review sections summarize the essential background. For graduate students, inline exercises and supplemental references provided in per-chapter endnotes provide a bridge to further topics and

a springboard to the research literature; for those in industry and government, pointers are provided to helpful surveys and relevant standards, e.g., documents from the Internet Engineering Task Force (IETF), and the U.S. National Institute of Standards and Technology.

Computer Security and the Internet

Index of Conference Proceedings

PRIMA has emerged as a major platform for academic and research exchange on agent technologies. The PRIMA workshop series was initiated as a workshop of the Pacific Rim International Conference in Artificial Intelligence (PRICAI) to provide a forum that would bring together research in the areas of agent technology and multi-agent systems, both in the Pacific Rim region and beyond. The inaugural workshop in the series was held in Singapore in 1998, with subsequent meetings in Kyoto (1999), Melbourne (2000), Taipei (2001), Tokyo (2002), Seoul (2003), Auckland (2004), Kuala Lumpur (2005) and Guilin (2006). At the 10th PRIMA in Bangkok in November 2007, the Steering Committee agreed that the series had grown in size and achieved a level of maturity to become a conference series of its own. It was therefore agreed that from Bangkok in 2007 PRIMA would stand for the Pacific Rim

International Conference on Multi-Agent Systems. PRIMA 2007 received 102 valid submissions. Each submission was peer-reviewed by at least three referees selected from the Program Committee. As a result of the selection process, 22 submissions were accepted as full research papers, yielding an acceptance rate of 21.67%. In addition the program included 11 application papers and 16 short papers. A special session on Agent-Oriented Software Engineering (AOSE) was organized by Graham Low from the University of New South Wales (Australia) and Ghassan Beydoun from the University of Wollongong (Australia), where papers were invited from the AOSE community, but put through the same rigorous reviewing process.
