Driving Identities examines long-standing connections between popular music and the automotive industry and how this relationship has helped to construct and

reflect various socio-cultural identities. It also challenges common assumptions regarding the divergences between industry and art, and reveals how music and sound are used to suture the putative divide between human and non-human. This book is a ground-breaking inquiry into the relationship between popular music and automobiles, and into the mutual aesthetic and stylistic influences that have historically left their mark on both industries. Shaped by new historicism and cultural criticism, and by methodologies adapted from gender, LGBTQ+, and African-American studies, it makes an important contribution to understanding the complex and interconnected nature of identity and cultural formation. In its interdisciplinary approach, melding aspects of ethnomusicology, sociology, sound studies, and business studies, it pushes musicological scholarship into a new consideration and awareness of the complexity of identity construction and of influences that inform our musical culture. The volume also provides analyses of the confluences and coactions of popular music and automotive products to highlight the mutual influences on their respective aesthetic and technical evolutions. *Driving Identities* is aimed at both academics and enthusiasts of automotive culture, popular music, and cultural studies in general. It is accompanied by an extensive online database appendix of car-themed pop recordings and sheet music, searchable by year, artist, and title.

Blueprint for Action provides a framework for understanding the dynamics of organizational change in early care and education settings. It helps administrators move beyond a "quick fix" notion of center improvement by serving as a guide for organizational analysis and action. The book details a comprehensive method for assessing program strengths and areas in need of improvement. The heart of this approach is an individualized model of supervision and staff development. Woven throughout the text are numerous vignettes connecting the concepts to real-life situations experienced by early childhood administrators. The book includes 26 assessment tools and 12 worksheets that directors can adapt for use in their own programs.

The automotive industry is still one of the world's largest manufacturing sectors, but it suffers from being very technology-focused as well as being relatively short-term focused. There is little emphasis within the industry and its consultancy and analyst supply network on the broader social and economic impacts of automobility and of the sector that provides it. The Global Automotive Industry addresses this need and is a first port of call for any academic, official or consultant wanting an overview of the state of the industry. An international team of specialist researchers, both from academia and business, review and analyse the key issues that make vehicle manufacturing still the world's premier manufacturing sector, closely tied in with the fortunes of both established and newly emerging economies. In doing so, it covers issues related to manufacturing, both established practices as well as new developments; issues relating to distribution, marketing and retail, vehicle technologies and regulatory trends; and, crucially, labour practices and the people who build cars. In all this it explains both how the current situation arose and also likely future trajectories both in terms of social and regulatory trends, as the technological, marketing and labour practice responses to those, leading in many cases to the development of new business models. Key features

- Provides a global overview of the automotive industry, covering its current state and considering future challenges

subjects include the nineteenth-century rise of British trade, merchants and explorers, of investment and railways, and of British imperialism. Spanning the period from the Napoleonic Wars until the end of the twentieth century, it provides a comprehensive history of the unique British community in Argentina. Later sections examine the decline of British influence in Argentina from World War I into the early 1950s. Finally, the book traces links between British multinationals and the political breakdown in Argentina of the 1970s and early 1980s, leading into dictatorship and the Falklands War. Combining economic, social and political history, this extensive volume offers new insights into both the historical development of Argentina and of British interests overseas.

Recent research has demonstrated that, in the Roman, Late Antique, Early Islamic and Medieval worlds, glass was traded over long distances, from the Eastern Mediterranean, mainly Egypt and Israel, to Northern Africa, the Western Mediterranean and Northern Europe. Things that Travelled, a collaboration between the UCL Early Glass Technology Research Network, the Association for the History of Glass and the British Museum, aims to build on this knowledge. Covering all aspects of glass production, technology, distribution and trade in Roman, Byzantine and Early Medieval/Early Islamic times, including studies from Britain, Egypt, Cyprus, Italy and many others, the volume combines the strengths of the sciences and cultural studies to offer a new approach to research on ancient glass. By bringing together such a varied mix of contributors, specialising in a range of geographical areas and chronological time frames, this volume also offers a valuable contribution to broader discussions on glass within political, economic, cultural and historical arenas.

What is a young lady like Loveday Brooke doing in a private detective agency? She's working there, as a clever sleuth, a female Sherlock Holmes of sorts. Excerpts: "Loveday Brooke, at this period of her career, was a little over thirty years of age, and could be best described in a series of negations."She was not tall, she was not short; she was not dark, she was not fair; she was neither handsome nor ugly. Her features were altogether nondescript; her one noticeable trait was a habit she had, when absorbed in thought, of dropping her eyelids over her eyes till only a line of eyeball showed, and she appeared to be looking out at the world through a slit, instead of through a window. Her dress was invariably black, and was almost Quaker-like in its neat primness."But

A richly illustrated history, Civil War and Revolution on the Rio Grande Frontier contains more than 125 of the best images taken by Louis de Planque and other photographers, the vast majority having never been published. From numerous archives and private collections, these images include everything from the destruction following the killer hurricane of 1867 to gripping views of the heart-wrenching hanging of an American army deserter and three unfortunate followers of Cortina, who happened to get caught on the wrong side of the river. Also included are rare scenes of Brownsville, Matamoros, and vice-ridden Bagdad, as well as Juaristas, Imperialistas, Cortinistas, Confederates, Federals, Unionists, cotton traders, journalists, merchants, socialities, de Planque himself, and more than one bandit. Accompanying these images is a comprehensive narrative that superbly chronicles the historic events that engulfed this raw and vast frontier during this tumultuous era. Representing a significant historical achievement, the book is prodigiously researched and detailed.

Revealing the young general's reasons for leading the expedition against Egypt in 1798 and showcasing his fascinating views of the Orient, Cole delves into the psychology of the military titan and his entourage. He paints a multi-faceted portrait of the daily travails of the soldiers in Napoleon's army, including how they imagined Egypt, how their expectations differed from what they found, and how they grappled with military challenges in a foreign land. Cole ultimately reveals how Napoleon's invasion, the first modern attempt to invade the Arab world, invented and crystallized the rhetoric of liberal imperialism.
