This work challenges the notion that globalization encourages economic convergence and cultural homogenization across national borders. By comparing organizational change in various countries, the author finds that global competition necessitates the exploitation of distinctive strengths.

From 2001 to 2011, the International Accounting Standards Board (IASB) and its International Financial Reporting Standards (IFRSs), acquired a central position in the practice and regulation of financial reporting around the world. As a unique instance of a private-sector body setting standards with legal force in many jurisdictions, the IASB's rise to prominence has been accompanied by vivid political debates about its governance and accountability. Similarly, the IASB's often innovative attempts to change the face of financial reporting have made it the centre of numerous controversies. This book traces the history of the IASB from its foundation as successor to the International Accounting Standards Committee (IASC), and discusses its operation, changing membership and leadership, the development of its standards, and their reception in jurisdictions around the world. The book gives particular attention to the IASB's relationships with the European Union, the United States, and Japan, as well as to the impact of the financial crisis on the IASB's work. By its in-depth coverage of the history of the IASB, the book provides essential background information that will enrich the perspective of everyone who has to deal with IFRSs or the IASB at a technical or policy-making

In this humorous mix of travelogue and memoir, a writer temporarily moves his California family north to Canada's Polar Bear Capital of the World. Welcome to Churchill, Manitoba. Year-round human population: 943. Yet despite the isolation and the searing cold here at the arctic's edge, visitors from around the globe flock to the town every fall, driven by a single purpose: to see polar bears in the wild. Churchill is "The Polar Bear Capital of the World." And for one unforgettable "bear season," Zac Unger, his wife, and his three children moved from Oakland, California, to make it their temporary home. But they soon discovered that it's really the polar bears who are at home in Churchill, roaming past the coffee shop on the main drag, peering into garbage cans, scratching their backs against fence posts and front doorways. Where kids in other towns receive admonitions about

talking to strangers, Churchill schoolchildren get “Let’s All Be Bear Aware” booklets to bring home. (Lesson number 8: Never explore bad-smelling areas.) Zac Unger takes readers on a spirited and often wildly funny journey to a place as unique as it is remote, a place where natives, tourists, scientists, conservationists, and the most ferocious predators on the planet converge. In the process he becomes embroiled in the controversy surrounding “polar bear science”—and finds out that some of what we’ve been led to believe about the bears’ imminent extinction may not be quite the case. But mostly what he learns is about human behavior in extreme situations . . . and also why you should never even think of looking a polar bear in the eye.

The question of how law matters has long been fundamental to the law and society field. Social science scholarship has repeatedly demonstrated that law matters less, or differently, than those who study only legal doctrine would have us believe. Yet research in this field depends on a belief in the relevance of law, no matter how often gaps are identified. These essays show how law is relevant in both an "instrumental" and a "constitutive" sense, as a tool to accomplish particular purposes and as an important force in shaping the everyday worlds in which we live. Essays examine these issues by focusing on legal consciousness, the body, discrimination, and colonialism as well as on more traditional legal concerns such as juries and criminal justice.

The focus is more on questions relating to the organization and educational mission of the for-profit sector than on its economics. Finally, the overall purpose of this effort is to focus on for-profit higher education as a "third sector" of the higher education enterprise, part of the same universe of institutions as traditional not-for-profit private and public colleges and universities. Significant scholarship has been devoted to the public and nonprofit private sectors, drawing out their distinctiveness and organizational idiosyncrasies. Similar attention should be paid to this third sector, with close attention to the variety of practices that fall under the label of for-profit higher education.

The Industrial Revolution, powered by oil and other fossil fuels, is spiraling into a dangerous endgame. the global economy, humanity is desperate for a sustainable economic game plan to take us into the future. Here, Jeremy Rifkin explores how Internet technology and renewable energy are merging to create a powerful "Third Industrial Revolution." He asks us to imagine hundreds of millions of people producing their own green energy in their homes, offices, and factories, and sharing it with each other in an "energy internet," just like we now create and share information online. Rifkin describes how the five-pillars of the Third Industrial Revolution will create thousands of businesses, millions of jobs, and usher in a fundamental reordering of human relationships, from hierarchical to lateral power, that will impact the way we conduct commerce, govern society, educate our children, and engage in civic life. Rifkin's vision is already gaining traction in the international community. The European Union Parliament has issued a formal declaration calling for its implementation, and other nations in Asia, Africa, and the Americas, are quickly preparing their own initiatives for transitioning into the new economic paradigm. The Third Industrial Revolution is an insider's account of the next great economic era, including a look into the personalities and players — heads of state, global CEOs, social entrepreneurs, and NGOs — who are pioneering its implementation around the world.

Thread one. An old grizzly: CP023, with an attitude and a reputation, gets rid of its radio-collar, and wanders out of the National Park boundaries. Thread two. Doug Haldane is hiking up to the town of Hudgin's Mills, located in one of those intermountain valleys, deep in the Rockies. Fifteen miles short of his destination he sees an accident unfold on the other side of a narrow lake. A small boat appears out of the gorge between Hudgin's lake and this one. He sees that the boat is badly damaged but is afloat. There is a family aboard that needs urgent help. He watches them for a few minutes and sees them bring the boat to shore. They appear to be injured. He is hours from a road or other rescue, so with the impetuosity of youth, he takes the matter into his own hands and swims across. Thread three. The Whitcomb family is stranded after being pulled down Lesser Hell's Canyon Gorge in their small boat. It is a hair-raising roller coaster of a ride that few could expect to survive. They are dumped into the lake almost fifteen miles below the one they had been on an hour earlier, and needing medical help. No one knows where they are, and the weather is about to turn against them. Then, unbelievably, they see a young man swimming across the lake to get to them. They see salvation. However, nothing is as simple as it seems, and lives are irrevocably changed on that day when he comes ashore. It becomes a weekend none of them will ever forget when the disparate threads come together. Fate, decrees that there will be one very violent death, and that two lives will be forever

Providing a timely contribution to the ongoing questions surrounding topics which are by definition subject to varying stakeholder interpretations, this book addresses “the missing link” between theoretical CSR concepts and everyday management practice. It acts as a guide to awaken managers to the advantages of adopting a CSR “mindset” when developing sustainable business strategies. The book consists of three parts: 1) A theoretical realm which establishes the key concepts and rationale for the adoption of a sustainable CSR approach, 2) A practical realm which addresses putting CSR and sustainability into business practice, 3) An educational realm which proposes how to incorporate the concepts into teaching and training.

Birth of the Alliance

Superdiversity has rendered familiar places, groups and practices extraordinarily complex, and the traditional tools of analysis need rethinking. In this book, Jan Blommaert investigates his own neighbourhood in Antwerp, Belgium, from a complexity perspective. Using an innovative approach to linguistic landscaping, he

demonstrates how multilingual signs can be read as chronicles documenting the complex histories of a place. The book can be read in many ways: as a theoretical and methodological contribution to the study of linguistic landscape; as one of the first monographs which addresses the sociolinguistics of superdiversity; or as a revision of some of the fundamental assumptions of social science through the use of chaos and complexity theory as an inspiration for understanding the structures of contemporary social life.
