This book is the first compilation of its kind that brings together discussions of the evolution of scholarship in different branches of the Social Sciences. It presents a comprehensive multi-disciplinary text exploring the changing dynamics of the

Social Sciences in Ghana, offering a broader perspective from which to view the evolution, theory, methods, substance and relevance of each of the Social Science disciplines and their multiple interfaces. The introduction and the conclusion are devoted to the theoretical, comparative and empirical debate over the Social Sciences from historical and analytical perspectives. Written by acknowledged experts, the 15 chapters span the following disciplines: Archaeology and Heritage Studies; History; Geography; Psychology; Sociology and Anthropology; Social Work; Economics; Political Science; International Affairs; Information Studies; Communication Studies; African Studies; Development Studies; Women's and Gender Studies and Adult and Continuing Education. Changing Perspectives on the Social Sciences in Ghana offers sophisticated perspectives for comparing and appreciating the synergies, differences, trends and nuances among and between the Social Science disciplines in Ghana, in a holistic and scholarly manner.

### **Which Degree?**

This biography of the applied English economist Arthur (A.J.) Brown, an English economist from the late 1930s to the 1980s, sets his work in the context of the Great Depression, the emergence of Oxford University as a centre of applied economic research, the contraction of British colonialism in Africa, the enlarging of the UK university system, the post-war arms race, the UK joining the Common Market, and significant changes in the industrial structure of Britain.

One of the main features of the world economy since the late nineteenth century has been the growing dominance of the American economy in both quantitative and qualitative terms. Aspects of this development - e.g. rationalization or the world-wide diffusion of Coca-Cola - have been researched, but largely in isolation. Americanization of the European Economy provides a comprehensive yet compact survey of the growth of American economic influence in Europe since the 1880s. Three distinct but cumulative waves of Americanization are identified. Americanization was (and still is) a complex process of technological, political, and cultural transfer, and this overview explains why and how the USA and the American model of industrial capitalism came to be accepted as the dominant paradigm of political economy in today's Europe. Americanization of the European Economy summarizes the ongoing discussion by business historians, sociologists, and political scientists and makes it accessible to all types of readers who are interested in political and economic development.
