The Scalpel, the Sword

Training Camp

A Harvard-educated neurosurgeon reveals his experiences—in and out of the operating room—with apparitions, angels, exorcism, after-death survival, and the miracle of hope. For the millions who have enjoyed Proof of Heaven, Heaven is Real, To Heaven and Back, and Getting to Heaven—an inspiring tale from where the veil between life and death is often at its thinnest. The Scalpel and the Soul explores how premonition, superstition, hope, and faith not only become factors in how patients feel but can change outcomes. It validates the spiritual manifestations physicians see every day and empowers patients to voice their spiritual needs when they seek medical help. Finally, it addresses the mysterious, attractive powers the soul exerts during life-threatening events.

The Scalpel and the Soul

The Killer Instinct series from New York Times bestselling author Cynthia Eden continues as an FBI profiler tracks a case that resurrects ghosts from his past Ex-SEAL Tucker Frost knows that the world is full of evil. He saw it in the face of his own brother, Jason Frost, a cold, methodical, sadistic killer. A killer Tucker put down with his own hands in order to save Jason's final victim—Dawn Alexander, the only girl who got away from the infamous "Iceman." It's Tucker's up close and personal experience with evil that's made him perfect for Samantha Dark's

experimental profiling division in the FBI. And when women start turning up murdered with the same MO used by the Iceman, Tucker is sent back to Louisiana to investigate. Ten full years have passed since the night that Tucker faced down his brother...and since he last saw Dawn, his one-time lover. But as Tucker and Dawn grapple with a desire that never died, they must also face the shared shadow from their pasts. Both have the same question—has Jason Frost come back from the dead to hunt again? And this time, will he succeed in killing the victim who got away?

Subjugated Man

We know the bedrock themes upon which the Christian faith stands: creation, fall, redemption, restoration. As Christians, we live within these great moments of God's plan for humanity and all of his creation. In other words, our lives are part of Christian theology—every part of our lives, even surgery. As a part of Zondervan's Ordinary Theology series, *The Scalpel and the Cross* recounts New Testament professor Gene Green's encounter with open-heart surgery and carefully examines the many ways in which Christian doctrine spoke into the experience. The result is a short book that avoids shallow explanations and glib promises, instead guiding readers to deeper understanding and enduring hope in the face of one of modern life's necessary traumas.

and fifties. Even though he has a decent education, a keen mind, classic good looks, and no shortage of female attention, he isn't content. He just can't contain his disdain for the elitist world he is supposed to crave. After a serious auto accident cripples Ron Carter, one of his classmates—while Merlin is in the driver's seat—Merlin decides to follow his ambitions to medical school, struggling to balance his uncontrolled lust for women with his commitment to academic success. His classmate, however, chooses a much darker path through life. Years later, Ron is now the head of a powerful crime syndicate, full of resentment and the desire for revenge. He offers Merlin the chance to pay off his excessive debts, and sooner than he realizes, the young doctor is caught up in a web of embezzlement, murder, and lies. Now Merlin is a wanted man, on the run from powerful enemies in a Mexican drug cartel. If he's not careful, he'll lose not only his freedom but his life. Will a staged death and escape into Mexico ensure his future?

Practical Skin Cancer Surgery

This comprehensive anthology collects works of fiction, poetry, drama, and essay-writing from a pivotal time in Japanese history. In addition to their literary achievements, the texts reflect the political, social, and intellectual changes that occurred in Japanese society during this period, including exposure to Western ideas and literature, the rise of nationalism, and the complex interaction of traditional and modern forces. The volume offers outstanding, often new translations of classic texts by such celebrated writers as Nagai Kafu, Shimazaki Toson, Natsume Soseki, Kawabata Yasunari, and Yosano Akiko. The editors have also unearthed works from lesser-known women writers, many of which have never been available in English. Organized chronologically and by genre within each period, the volume reveals the major influences in the development of modern Japanese literature: the Japanese classics themselves, the example of Chinese poetry, and the encounter with Western literature and culture. Modern Japanese writers reread the classics of Japanese literature, infused them with contemporary language, and refashioned them with an increased emphasis on psychological elements. They also reinterpreted older aesthetic concepts in light of twentieth-century mentalities. While modern ideas captured the imagination of some Japanese writers, the example of classical Chinese poetry remained important for others. Meiji writers continued to compose poetry in classical Chinese and adhere to a Confucian system of thought. Another factor in shaping modern Japanese literature was the example of foreign works, which offered new literary inspiration and opportunities for Japanese readers and writers. Divided into four chapters, the anthology begins with the early modern texts of the 1870s, continues with works written during the years of social change preceding World War I and the innovative writing of the interwar period, and concludes with texts from World War II. Each chapter includes a helpful critical introduction, situating the works within their literary, political, and cultural contexts. Additionally, there are biographical introductions for each writer.

An attorney is murdered. Another attorney is murdered. And another. It looks, one observer suggests, like somebody here has a serious problem with attorneys! Two surgeons, a man and wife. She is sued for malpractice and loses her case-a devastating blow to a proud professional that drives her into terrible despair and finally suicide. He watches his wife slowly pushed toward self-destruction by the cynical hostility of prosecutors in a legal system that has lost its concern for justice. But he decides he'll reintroduce justice into the system-his own kind, administered in his own way. Then malpractice attorneys begin to turn up dead. Each one is uniquely executed-and surgically altered in bizarre and disturbing ways. There are no fingerprints, no blood. Few clues are left behind. Usable evidence is sparse. And the killer, as he contemplates what he's accomplished, silently dedicates each murder to the memory of his beloved wife. The police detective assigned to this case, Septimus "Mac" McClymonds, soon confirms that he is in a battle of wits with a most unusual and highly intelligent serial killer. As he carefully studies the details of each crime, attempting to develop a profile of the perpetrator, he finds himself continually frustrated, and he is even taunted with grim humor by macabre notes the murderer leaves on the bodies of his victims, celebrating yet another death. Thus develops a cat-and-mouse game between Mac and his quarry, until the elusive killer finally seems to have been identified and Mac is about to nab him-except for

Anatomy Without a Scalpel

As an active surgeon and former department chairman, Dr. Paul A. Ruggieri has seen the good, the bad, and the ugly of his profession. In *Confessions of a Surgeon*, he pushes open the doors of the O.R. and reveals the inscrutable place where lives are improved, saved, and sometimes lost. He shares the successes, failures, remarkable advances, and camaraderie that make it exciting. He uncovers the truth about the abusive, exhaustive training and the arduous devotion of his old-school education. He explores the twenty-four-hour challenges that come from patients and their loved ones; the ethics of saving the lives of repugnant criminals; the hot-button issues of healthcare, lawsuits, and reimbursements; and the true cost of running a private practice. And he explains the influence of the "white coat code of silence" and why patients may never know what really transpires during surgery. Ultimately, Dr. Ruggieri lays bare an occupation that to most is as mysterious and unfamiliar as it is misunderstood. His account is passionate, illuminating, and often shocking-an eye-opening, never-before-seen look at real life, and death, in the O.R.

This is not just a book about surgery. It is not even just about surgery in a remote jungle station. It is about God and His unpredictable working in the life and ministry of a missionary kid from Cambodia who ends up as a medical doctor at an isolated hospital in Gabon, West Africa. You will laugh when a "simple" outhouse building project turns into a comedy of errors. You will cry when a pregnant, retarded and

epileptic girl arrives at the hospital and gives birth to "Grace." But most of all, you will come to understand that there is a love that reaches beyond the possible to embrace the sick and the hopeless and the unlovely—God's love generously displayed by God's servants.

Iris Culture and Hybridizing for Everyone

A brilliant and courageous doctor reveals, in gripping accounts of true cases, the power and limits of modern medicine. Sometimes in medicine the only way to know what is truly going on in a patient is to operate, to look inside with one's own eyes. This book is exploratory surgery on medicine itself, laying bare a science not in its idealized form but as it actually is -- complicated, perplexing, and profoundly human. Atul Gawande offers an unflinching view from the scalpel's edge, where science is ambiguous, information is limited, the stakes are high, yet decisions must be made. In dramatic and revealing stories of patients and doctors, he explores how deadly mistakes occur and why good surgeons go bad. He also shows us what happens when medicine comes up against the inexplicable: an architect with incapacitating back pain for which there is no physical cause; a young woman with nausea that won't go away; a television newscaster whose blushing is so severe that she cannot do her job. Gawande offers a richly detailed portrait of the people and the science, even as he tackles the paradoxes and imperfections inherent in caring for human lives. At once tough-minded and humane, *Complications* is a new kind of medical writing, nuanced and lucid, unafraid to confront the conflicts and uncertainties that lie at the heart of modern medicine, yet always alive to the possibilities of wisdom in this extraordinary endeavor. *Complications* is a 2002 National Book Award Finalist for Nonfiction.

In Hospital and Camp

This first book by the much-loved stars of TV's *VILLAGE VETS* is the unforgettable, hilarious, heartwarming and hair-raising adventures of two country vets, the animals they treat and the characters they meet. Best mates since they met on their first day at uni, Anthony Bennett and James Carroll both dreamed of working with animals from the time they were knee high. Little did these down-to-earth country vets know their dreams would find them unlikely TV stars, their larrikinism and genuine affection for the people they meet and the animals they treat winning the hearts of Australians everywhere. *Village Vets* takes us back to their early years, from their hilarious escapades at university, to their intrepid adventures in the UK and the Australian bush, to setting up their own practice in an idyllic coastal town in New South Wales. But if you thought country towns were sleepy, think again. Anthony and James have done it all - operated on guinea pigs and euthanased fish; treated a horse that had lost its foot and fixed a prolapsed cow with a piece of polypipe. And then there was the day that involved four calvings, one severed artery, one fox-bait poisoning, one skewered kelpie, one snakebite and 480 kilometres of driving. An Australian version of James Herriot's *All Creatures Great and Small*, *Village Vets* will by turns charm you, make you laugh out loud and bring a tear to your eye. Join Anthony and James as they take you on an unforgettable journey into the heartache and joy of life as country vets, who are so often up to their armpits in something!

The Twentieth Century

Would the world be a better place if women were in charge? Heads of state and world leaders are now women, they have changed the world to be how they want it to be. With women in charge they have stopped the days of mail order brides, now we live in a world of rental husbands. We live in a world where men are secondary, used for whatever women want. Men are trained to be whatever their owner wants them to be: enforcer, worker, bodyguard or personal slave. Sold into slavery when he was a baby, Scott Magentas life is to be seen not heard, to be touched but never loved. His life is filled with death and pain while he is forced to be nothing but a glorified one night stand for the rich and powerful. Slaves are treated like show animals, they make their owner money and if they misbehave they can be punished by their owner. When the whole world doesnt see you as a person how can you be one?

The Scalpel, the Sword

Originally published in the early 1950s, The Scalpel, the Sword celebrates the turbulent career of Dr. Norman Bethune (1890-1939), a brilliant surgeon, campaigner against private medicine, communist, and graphic artist. Bethune belonged to that international contingent of individuals who recognized the threat of fascism in the world and went out courageously to try to defeat it. Born in Gravenhurst, Ontario, Bethune introduced innovative techniques in treating battlefield injuries and pioneered the use of blood transfusions to save lives, which made him a legend first in Spain during the civil war and later in China when he served with the armies of Mao Zedong in their fight against the invading Japanese. He is today remembered amongst the pantheon of Chinese revolutionary heroes. In Canada Bethune's strong left-wing views made him persona non grata, but this highly readable and engaging account has helped to sustain the memory of a great man.

The Leader's Guide to Radical Management

In *Entitled to Nothing*, Lisa Sun-Hee Park investigates how the politics of immigration, health care, and welfare are intertwined. Documenting the formal return of the immigrant as a “public charge,” or a burden upon the State, the author shows how the concept has been revived as states adopt punitive policies targeting immigrants of color and require them to “pay back” benefits for which they are legally eligible during a time of intense debate regarding welfare reform. Park argues that the notions of “public charge” and “public burden” were reinvigorated in the 1990s to target immigrant women of reproductive age for deportation and as part of a larger project of “disciplining” immigrants. Drawing on nearly 200 interviews with immigrant organizations, government agencies and safety net providers, as well as careful tracking of policies and media coverage, Park provides vivid, first-person accounts of how struggles over the “public charge” doctrine unfolded on the ground, as well as its consequences for the immigrant community. Ultimately, she shows that the concept of “public charge” continues to lurk in the background, structuring our conception of who can legitimately access public programs and of the moral economy of work and citizenship in the U.S., and makes important policy suggestions for reforming our immigration system.

The Scalpel, the Sword

A radical new management model for twenty-first century leaders Organizations today face a crisis. The crisis is of long standing and its signs are widespread. Most proposals for improving management address one element of the crisis at the expense of the others. The principles described by award-winning author Stephen Denning simultaneously inspire high productivity, continuous innovation, deep job satisfaction and client delight. Denning puts forward a fundamentally different approach to management, with seven inter-locking principles of continuous innovation: focusing the entire organization on delighting clients; working in self-organizing teams; operating in client-driven iterations; delivering value to clients with each iteration; fostering radical transparency; nurturing continuous self-improvement and communicating interactively. In sum, the principles comprise a new mental model of management. Author outlines the basic seven principles of continuous innovation The book describes more than seventy supporting practices Denning offers a rethinking of management from first principles This book is written by the author of *The Secret Language of Leadership*—a Financial Times Selection in Best Books of 2007.

While Universal's Dracula and Frankenstein (both 1931) have received the most coverage of any of the studio's genre releases, it is the lesser known films that have long fascinated fans and historians alike. Starting with The Last Warning, a 1929 movie released as both a silent and a talkie, Universal provided a decade of films that entertained audiences and sometimes frustrated critics. Each of Universal's horror, science fiction and "twisted mystery" films receives an in-depth essay for each film. The focus is first on the background to the making of the movie and its place in the Universal catalog. A detailed plot synopsis with critical commentary follows. Filmographic data for the film conclude the entry. Universal's The Shadow short film series is covered in an appendix. Many rare illustrations and movie posters are also included.

The Ride is a galactic tale of sex, adventure, and excessive drinking among those who travel the stars. My novel "The Ride" is a science fiction adventure about a man who makes his living traveling from planet to planet fighting dangerous animals. This is also a story about the women he meets and falls in love with, who don't want a serious relationship with a man who makes his living traveling from planet to planet fighting dangerous animals. The plot could be best described in the man's own words as "The monsters are easy, it's the girls that are dangerous." The story takes place in a distant future where mankind is one of several star traveling species who have spread throughout the galaxy. Communication across the galaxy is instantaneous, travel between star systems is mostly by scheduled public transport, there are no sexual diseases, no girl ever gets pregnant unless she wants to, and sex is just for fun.

Scalpel

Before the Scalpel: What Everyone Should Know about Anesthesia demystifies the issues surrounding the types and uses of anesthesia and addresses common fears about wakefulness and pain. Straightforward language, real-life examples, photographs and illustrations guide you. Individual chapters focus on how anesthesia is used in plastic and cosmetic surgery, labor, and for dental care. Other chapters explore the special needs of babies and children, how surgeons and anesthesiologists have adapted their techniques in response to growing obesity rates, and discuss how to avoid post-operative nausea and vomiting. Throughout the book, Dr. Dhar carefully flags issues directly affecting your medical care. Each chapter ends with an invaluable checklist, called prescriptives, that highlights key points and provides space to take notes when you talk with your surgeon or anesthesia provider. The checklists help you ask questions relevant to your case and ensure that you receive and remember the answers.
