"Filled with personal experiences and scriptural accounts, this book is incredibly thoughtful. Williams delves deeply into the question of Christian community and asks some tough questions. His answers to bringing about koinonia [spiritual community] are not easy, but are biblically sound. Never trite or simplistic, this book is likely to leave readers feeling validated, not judged. Williams seems to have a good grasp on how to make a community welcoming, supportive and Christ-like." -P. Hooper, US Review of Books

Roger L Dudley and Des Cummings, Jr explain in careful, practical detail how to apply the principles of church growth to SDA congregations. They present the findings of the extensive studies done by the Institute of Church Ministry on such topics as why SDA congregations grow or decline, who joins the church, and who leaves and why. The authors explain the resources and tools available to the pastor and administrator, and how to use them. The book shows how to motivate

the whole congregation so that church growth is its goal, not just that denominational leadership. - Introduction, What Is Growth? ### **Adventures in Church Growth**

A practical guide for those struggling to build a community of believers in a culture that wants to experience belonging over believing Who is my neighbor? Who belongs to me? To whom do I belong? These are timeless questions that guide the church to its fundamental calling. Today terms like neighbor, family, and congregation are being redefined. People are searching to belong in new places and experiences. The church needs to adapt its interpretations, definitions, and language to make sense in the changing culture. This book equips congregations and church leaders with tools to:

- Discern the key ingredients people look for in community
- Understand the use of space as a key element for experiencing

belonging and community • Develop the “chemical compound” that produces an environment for community to spontaneously emerge • Discover how language promotes specific spatial belonging and then use this knowledge to build an effective vocabulary for community development • Create an assessment tool for evaluating organizational and personal community health
