Christopher Loveluck's study explores the transformation of Northwest Europe (primarily Britain, France and Belgium) from the era of the first post-Roman 'European Union' under the Carolingian Frankish kings to the so-called 'feudal' age, between c. AD 600 and 1150. During these centuries radical changes occurred in the organisation of the rural world. Towns and complex communities of artisans and merchant-traders emerged and networks of contact between northern Europe, the Mediterranean, and the Middle and Far East were redefined, with long-lasting consequences into the present day. Loveluck provides the most comprehensive comparative analysis of the rural and urban archaeological remains in this area for twenty-five years. Supported by evidence from architecture, relics, manuscript illuminations and texts, this book explains how the power and intentions of elites were confronted by the aspirations and actions of the diverse rural peasantry, artisans and merchants, producing both intended and unforeseen social changes.

In the world of architectural conservation, there is little tolerance for reconstructing or even protecting historic facades when everything behind is modern, and even less for reconstructing a building that has been completely destroyed. These offenses are considered lies against history. In this thoughtful, revealing work, conservation expert Wim Denslagen traces this predilection for honesty to the legacy of Functionalism, a Romantic-era movement that denounced the building of pseudo-architecture in favor of a new, rational form of building. With detailed analyses of headline-making restoration projects from Bruges to Berlin, Denslagen shows that the adoption of these romantic values by conservationists gave rise to a new wave of modern additions and transformations.

## **A Theory of Semiotics**

One of the 20th century's enduring works, One Hundred Years of Solitude is a widely beloved and acclaimed novel known throughout the world, and the ultimate achievement in a Nobel Prize-winning career. The novel tells the story of the rise and fall of the

mythical town of Macondo through the history of the Buendía family. It is a rich and brilliant chronicle of life and death, and the tragicomedy of humankind. In the noble, ridiculous, beautiful, and tawdry story of the Buendía family, one sees all of humanity, just as in the history, myths, growth, and decay of Macondo, one sees all of Latin America. Love and lust, war and revolution, riches and poverty, youth and senility -- the variety of life, the endlessness of death, the search for peace and truth -- these universal themes dominate the novel. Whether he is describing an affair of passion or the voracity of capitalism and the corruption of government, Gabriel García Márquez always writes with the simplicity, ease, and purity that are the mark of a master. Alternately reverential and comical, *One Hundred Years of Solitude* weaves the political, personal, and spiritual to bring a new consciousness to storytelling. Translated into dozens of languages, this stunning work is no less than an accounting of the history of the human race.

This book investigates the nature of aesthetic experience and aesthetic objects. Written by leading philosophers, psychologists, literary scholars and semioticians, the book addresses two intertwined issues. The first is related to the phenomenology of aesthetic experience: The understanding of how human beings respond to artworks, how we process linguistic or visual information, and what properties in artworks trigger aesthetic experiences. The examination of the properties of aesthetic experience reveals essential aspects of our perceptual, cognitive, and semiotic capacities. The second issue studied in this volume is related to the ontology of the work of art: Written or visual artworks are a specific type of objects, containing particular kinds of representation which elicit a particular kind of experience. The research question explored is: What properties in artful objects trigger this type of experience, and what characterizes representation in written and visual artworks? The volume sets the scene for state-of-the-art inquiries in the intersection between the psychology and ontology of art. The investigations of the relation between the properties of artworks and the characteristics of aesthetic experience increase our insight into what art is. In addition, they shed light on essential properties of human meaning-making in general.

### **1100 Words You Need to Know**

There have been dramatic increases in the financial, emotional, and psychological investment in pets over the past four decades. The increasing importance of animal companions in people's lives has resulted in growing emphasis on the human-animal bond within academic literature. This book introduces practicing and emerging professionals to vital subject matter concerning this growing specialty area by providing an essential framework and information through which to consider the unique contextual backdrop of the human-animal bond. Such contexts include a wide array of themes including: issues of attachment and loss, success and frustration with making and sustaining connections, world views regarding animal ethics, familial history of neglect or abuse, and cultural dynamics that speak to the order of things between mankind and nature. Adopting a contextual

stance will aid mental health professionals in appreciating why and how this connection has become a significant part of everyday life for many. As with any other important clinical dynamic, training and preparation are needed to gain competence for professional practice and research. To this end, an ensemble of international experts across the fields of psychology and mental health explore topics that will help both new and established clinicians increase and understanding of the various ways the human-animal bond manifests itself. Perspectives from beyond the scope of psychology and mental health such as anthropology, philosophy, literature, religion, and history are included to provide a sampling of the significant contexts in which the human-animal bond is established. What brings these divergent topics together in a meaningful way is their relevance and centrality to the contextual bonds that underlie the human-animal connection. This text will be a valuable resource that provides opportunities to deepen one's expertise in understanding the psychology of the human-animal bond.

Here Barbara Freitag examines all the literature on the subject since their discovery 160 years ago, highlighting the inconsistencies of the various interpretations in regard to origin, function and name. By considering the Sheela-na-gigs in their medieval social context, she suggests that they were folk deities with particular responsibility for assistance in childbirth. This fascinating survey sheds new light on a controversial phenomenon, and also contains a complete catalogue of all known Sheela-na-gigs, including hitherto unrecorded or unpublished figures.

Rising temperatures are affecting organisms in all of Earth's biomes, but the complexity of ecological responses to climate change has hampered the development of a conceptually unified treatment of them. In a remarkably comprehensive synthesis, this book presents past, ongoing, and future ecological responses to climate change in the context of two simplifying hypotheses, facilitation and interference, arguing that biotic interactions may be the primary driver of ecological responses to climate change across all levels of biological organization. Eric Post's synthesis and analyses of ecological consequences of

climate change extend from the Late Pleistocene to the present, and through the next century of projected warming. His investigation is grounded in classic themes of enduring interest in ecology, but developed around novel conceptual and mathematical models of observed and predicted dynamics. Using stability theory as a recurring theme, Post argues that the magnitude of climatic variability may be just as important as the magnitude and direction of change in determining whether populations, communities, and species persist. He urges a more refined consideration of species interactions, emphasizing important distinctions between lateral and vertical interactions and their disparate roles in shaping responses of populations, communities, and ecosystems to climate change.

is the first comprehensive encyclopedia of world photography up to the beginning of the twentieth century. It sets out to be the standard, definitive reference work on the subject for years to come. Its coverage is global – an important ‘first’ in that authorities from all over the world have contributed their expertise and scholarship towards making this a truly comprehensive publication. The Encyclopedia presents new and ground-breaking research alongside accounts of the major established figures in the nineteenth century arena. Coverage includes all the key people, processes, equipment, movements, styles, debates and groupings which helped photography develop from being ‘a solution in search of a problem’ when first invented, to the essential communication tool, creative medium, and recorder of everyday life which it had become by the dawn of the twentieth century. The sheer breadth of coverage in the 1200 essays makes the Encyclopedia of Nineteenth-Century Photography an essential reference source for academics, students, researchers and libraries worldwide.

Textual Metonymy employs a theoretical framework combining rhetoric, figurative theory and textlinguistics. In the process, a very full historical account of treatments of metonymy from classical traditions up to the present time is given and critiqued. The author proposes a semiotic approach to the treatment of metonymy, on the basis of which a textual model of metonymy as a process of representation is developed to account for text cohesion and text coherence.

### **English Villages**

With commanding skill, Thomas R. Martin tells the remarkable and dramatic story of how a tiny, poor, and threatened settlement grew to become, during its height, the dominant power in the Mediterranean world for five hundred years. Encompassing the period from Rome's founding in the eighth century B.C. through Justinian's rule in the sixth century A.D., he offers a distinctive perspective on the Romans and their civilization by employing fundamental Roman values as a lens through which to view both their rise and spectacular fall. Interweaving social, political, religious, and cultural history, Martin interprets the successes and failures of the Romans in war, political organization, quest for personal status, and in the integration of religious beliefs and practices with government. He focuses on the central role of social and moral values in determining individual conduct as well as decisions of state, from monarchy to republic to empire. Striving to reconstruct ancient history from the ground up, he includes frequent references to

ancient texts and authors, encouraging readers to return to the primary sources. Comprehensive, concise, and accessible, this masterful account provides a unique window into Rome and its changing fortune.

The third edition of A BIOGRAPHY OF THE ENGLISH LANGUAGE continues to examine the structure of language. The textbook discusses three important issues: languages and language change are systematic; the inner history of a language is profoundly affected by its outer history of political and cultural events; and the English of the past has everywhere left its traces on present-day English. By uncovering the language's past, one can better communicate with it. This Thematic Study is a joint venture between ICOMOS, the advisory body to UNESCO on cultural sites, and the International Astronomical Union. It presents an overall vision on astronomical heritage, attempts to identify what constitutes "outstanding universal significance to humankind" in relation to astronomy, and identifies broad issues that could arise in the assessment of cultural properties relating to astronomy. This is the first Thematic Study in any field of science heritage. It is elaborated using examples of properties from around the world, including some already on the World Heritage List or national Tentative Lists. The subject matter ranges from early prehistory to modern astrophysics and space heritage, and also prominently includes dark sky issues and modern observatory sites. An e-version of the Thematic Study was published in June 2010 in time to be presented to the 2010 meeting of UNESCO's World Heritage Committee, where it was duly approved. It has been circulated officially by the WHC to all of UNESCO's National Commissions. This full-colour paperback edition with some updates, and reformatted to new ICOMOS standards, was published in 2011 and is now offered for public sale.

Peter Lutz, PhD, brilliantly traverses the major milestones along the evolutionary path of biomedicine from earliest recorded times to the dawn of the 20th century. With an engaging narrative that will have you turning "just one more page" well into the night, this book revealingly demonstrates just how the modern scientific method has been shaped by the past. Along the way the reader is treated to some delightfully obscure anecdotes and a treasure trove of rich illustrations that chronicle the tortuous history of biomedical developments, ranging from the bizarre and amusing to the downright macabre. The reader will also be introduced to the major ideas shaping contemporary physiology and the social context of its

development, and also gain an understanding of how advances in biological science have occasionally been improperly used to satisfy momentary social or political needs.

### **History of Human Society**

First published in 1996, this comprehensive guide to the history of Britain and its peoples will be indispensable reading for the general enthusiast, as well as students. It is packed full of fascinating detail on everything from Hadrian's Wall to the Black Death to Tony Blair. The book was assembled over more than thirty years and has seen updates in three editions. "He has done for historical encyclopaedias what Samuel Johnson did for dictionaries." Andrew Roberts, *The Daily Telegraph* "An astonishing synthesis of information." Roger Scruton, *The Times* "An astonishing achievement, a compelling book for dipping into, a splendid work." Simon Hoggart, *The Guardian* "This marvellous book, which contains tens of thousands of historical facts will enlighten, amuse, and inform. Every home should have one." Simon Heffer, *The Daily Mail* "If you were marooned on that mythical desert island with only one history book, this would be the one to take. Buy three copies - one for the children, one for the grandchildren- and one for yourself." John Charmley, *The Daily Telegraph*
