Students preparing to succeed in today's workplace require solid training in communication skills and principles, as well as experience applying them in realistic professional contexts. In *Business and Professional Communication*, Kory Floyd and Peter Cardon incorporate substantial business-world experience throughout the text's principles, examples and activities. They ensure that the theories, concepts, and skills most relevant to the communication discipline are fully represented. The result is a program that helps students understand and apply communication skills in both their personal and professional lives. The 'People First' feature presents students with realistic scenarios that are sensitive, discomfoting, or tricky to manage. It then teaches students how to navigate those situations effectively. This gives students concrete skills for preserving relationships with others as they encounter these difficult conversations. Unique to the market, this text includes a dedicated chapter focused on perspective-taking: covering the processes of person-perception; common perceptual errors; the self-serving bias and the fundamental attribution error; the self-concept; and the processes of image management. This equips students to understand and pay attention to the perspectives of others. *Business and Professional Communication* also includes a dedicated chapter focused on career communication, encouraging students to engage in networking and to consider the priorities and points of view of others as they seek employment and begin to interact professionally.

In this 9th edition, James Watson and Anne Hill provide a detailed compendium of the different facets of personal, group, mass-media and internet communication that continues to be a vital source of information for all those interested in how communication affects our lives. They cover new applications and developments, such as the incorporation of Neuroscience techniques in advertising and marketing. Other updates include Cyber-bullying, Twitter scandals, conduct in media organizations, on-line lobbying, global protesting/petitioning, and gender issues relating to social media in general. While new entries explore the profound shifts that have taken place in the world of communication in recent years, the purpose of this new edition is not necessarily to keep abreast of every new media event but to reflect the trends that influence and prompt such events, such as the Leveson Inquiry and Report and phone hacking via mobile phones. Politics seems to be playing out more on Twitter than in The Times. This volume seeks to make its twenty-first century readers more media literate, as well as more critical consumers of modern

news.
