Drug Trafficking, Corruption and States is cutting edge research. Garay Salamanca and Salcedo-Albarán, along with their contributing authors help document the transition from economic to political imperatives within transnational drug cartels. The break from the Zetas by La Familia Michoacana is one example contained in their empirical survey. Social Network Analysis is their tool for illuminating the varying dynamics of cartel-state inter-penetration and reconfiguration. In doing so they clearly discern between State Capture (StC) and Co-opted State Reconfiguration (CStR). As the drug wars and criminal insurgencies rage in the Americas and beyond, this seminal framework will facilitate efforts by scholars, law enforcement officials, intelligence analysts and policymakers to understand shifts in sovereignty, and to illuminate the mechanisms of transnational illicit networks and their interaction with the state.

The author presents an analysis of each one of the parables, taking into account the context in which Jesus presented the parable, then how it was understood and used by the people of that day, and finally, how we can follow its teachings within our own context. Dr. Fricke is a retired missionary who taught in Latin American seminaries for many years, and wrote this book in Spanish.

This collection addresses the impact of armed conflict and explores pathways to peace across the world. Topics range from geopolitics to the effects of armed conflict on the environment, resources, health, children, and transnational migration. Others explore the social processes involved in post-conflict situations, and others still the lessons for achieving effective peace. The geographical concepts addressed include the notion of "conflict space," landscapes of terror, the relationship between violence and justice, the conditions for peace, and the dynamics of post-conflict. Methods include landscape analysis, interviews with a range of citizens, mapping and geographic information science, and policy analysis. Several papers address the situation of children in conflict zones, the impact of conflict on patterns of migration, the role of gender in achieving peace, the concept of territory as a basis for conflict and for negotiation of peace, as well as the economic impact of conflict. The studies cover several world regions, including Africa, the Middle East, South and Southeast Asia, and eastern Europe. This book was originally published as a special issue of Annals of the Association of American Geographers.

Uno de los mejores especialistas franceses en nuevas formas de criminalidad da respuesta a éstas y otras muchas cuestiones.
