Inverse problems arise in practical situations like geophysical exploration, medical imaging, and nondestructive evaluation, where measurements made on the exterior of a body are used to determine properties of the inaccessible interior. In the last twenty years there have been substantial developments in the mathematical theory of inverse problems, and applications have expanded greatly.

In this book, leading experts in the theory and applications of inverse problems offer extended surveys of such vital and rapidly expanding areas as microlocal analysis, reflection seismology, tomography, inverse scattering, and X-ray transforms.

Inside Out

One third of humanity is governed by two capitals, New Delhi and Beijing. Increasingly, these two countries are being led not from the top down, but rather from the Inside Out. In 2014, India overwhelmingly elected Narendra Modi minister, a man who rose to national prominence as chief minister of Gujarat, India's fastest growing state. Likewise, in 2013, Xi Jinping took over as president of China, having served as top official in Zhejiang and Shanghai, two of China's most prosperous provinces. Anticipating these trends and leadership transitions, William Antholis spent five months in 2012 traversing twenty Indian states and Chinese provinces, conducting over three hundred interviews, including with Narendra Modi. Antholis's detailed narratives show what both Modi and Xi Jinping learned firsthand: that local successes—and failures—will determine the future of the world's largest two nations. And his new forward, prepared for this edition, lays out key takeaways from the transitions of 2013 and 2014.

This volume focuses on the household as a primary context for the reproduction, and not merely reflection, of society. Domestic groups of north and south India, Nepal, Sri Lanka and Indians in Malaysia are studied. Each paper is a critical exploration of the way the household is embedded in society and mediates individual consciousness and societal principles. The contributors demonstrate that the understanding of small scale institutions is integral to a more adequate theory of society.

Peter Eisenman has been an innovative presence in the field of architecture and architectural theory for more than thirty years. Architect, educator, founder and director of the Institute for Architecture and Urbanism, he has given definition to the principal debates on the architecture of our past, present, and future. In this remarkable collection, nineteen of his most important essays are presented together for the first time. Generously illustrated and with a new introduction by the author, these writings assemble the ideas that both set and provoked contemporary architectural practice and theory. This collection ranges from comprehensive theoretical analyses to close readings of Eisenman's own work and that of such architects as Andrea Palladio, Ludwig Mies van der Rohe, Le Corbusier, Alison and Peter Smithson, James Stirling, Philip Johnson, and John Hedjuk. Providing new perspectives on these architects and on Eisenman's own methodologies, these writings present an insider's appraisal of the polemics that have defined architecture over the past half century and that continue as one of the major ongoing forces in the discourse today.

Public deliberation and group discussion can strengthen the foundations of civil society, even when the groups engaged in debate share a history of animosity. Scholars have begun to study the dialogue sustaining these conversations, especially its power to unite and divide groups and individuals. The twenty-four essays in this collection analyze public exchanges and the nature of sustained

dialogue within the context of race relations, social justice, ethnic conflicts, public-safety issues, public management, community design, and family therapy. They particularly focus on college campuses and the networks of organizations and actors that have found success there. Open discussion may seem like an idealistic if not foolhardy gesture in such milieus, yet in fact the practice proves crucial to establishing and reinforcing civic harmony.

Conflict can either destroy or create—depending on whether and how it is guided. This is the simple yet profound insight that underlies Jay Rothman's innovative new framework for understanding and transforming identity-based conflict in nations, organizations, and communities. Reading a newspaper, working in an organization, or sitting in on a town meeting can provide vivid examples of identity conflicts in action. Based in the national, organizational, and community groups that provide individuals with meaning, safety, and dignity, identity conflicts are passionate and volatile because they strike at our core: who we really are and what we care about most deeply. Though often impervious to traditional methods of conflict management, identity-based conflict also provides adversaries with dynamic opportunities for finding not only common ground, but higher ground than separate parties could have found on their own. Grounded in his grassroots conflict resolution work in the Middle East — work that earned him the honor of witnessing the historic White House handshake between Prime Minister Yitzhak Rabin and PLO President Yasser Arafat — and brilliantly refined to address a wide range of organizational and community conflicts, Rothman's ARIA model is a versatile and innovative synthesis of the best contemporary ideas in conflict management, resolution, and transformation. Step by step, Resolving Identity-Based Conflict

traces the ARIA journey through Antagonism, Resonance, Invention, and Action in a variety of environments. In straightforward, jargon-free language, Rothman conveys solid theoretical insights and practical how-to's that allow researchers and practitioners to: Recognize the crucial differences between identity- and resource-based conflicts Zero in on the needs and motivations shared by even the bitterest of adversaries Create joint agendas for groups in conflict Transform intragroup and intergroup conflicts in organizations of every k
