The Rise of the West, winner of the National Book Award for history in 1964, is famous for its ambitious scope and intellectual rigor. In it, McNeill challenges the Spengler-Toynbee view that a number of separate civilizations pursued essentially independent careers, and argues instead that human cultures interacted at every stage of their history. The author suggests that from the Neolithic beginnings of grain agriculture to the present major social changes in all parts of the world were triggered by new or newly important foreign stimuli, and he presents a persuasive narrative of world history to support this claim. In a retrospective essay titled "The Rise of the West after Twenty-five Years," McNeill shows how his book was shaped by the time and place in which it was written (1954-63). He discusses how historiography subsequently developed and suggests how his portrait of the world's past in The Rise of the West should be revised to reflect these changes. "This is not only the most learned and the most intelligent, it is also the most stimulating and fascinating book that has ever set out to recount and explain the whole history of mankind. . . . To read it is a great experience. It leaves echoes to reverberate, and seeds to germinate in the mind."—H. R. Trevor-Roper, New York Times Book Review

The Secret History

A unique insight into the reign of the imperial couple Justinian and Theodora is presented. The private and public life of the emperors, their deceit and destruction and its consequences are depicted. The book reveals secrets and gives voice to that age's common men. It is an essential landmark in the history of individual legal rights.

On The Concept of History is a politics & social sciences essay written by German philosopher and social science critic Walter Benjamin. On The Concept of History is one of Walter Benjamin's best known, and most controversial works. The politics & social sciences essay is composed of twenty numbered paragraphs in which Benjamin uses poetic and scientific analogies to present a critique of historicism. Walter Benjamin wrote the brief essay shortly before attempting to escape from Vichy France, where French collaborationist government officials were handing over Jewish refugees like Walter Benjamin to the Nazi Gestapo. Walter Benjamin completed On The Concept of History before fleeing to Spain where he unfortunately committed suicide. Benjamin's work is often required textbook reading in various subjects such as humanities, philosophy, and politics & social sciences.

On the Origins of War and the Preservation of Peace

A "brilliant and sobering" (Paul Kennedy, Wall Street Journal) look at the history and human costs of pandemic outbreaks The World Economic Forum #1 book to read for context on the coronavirus outbreak This sweeping exploration of the impact of epidemic diseases looks at how mass infectious outbreaks have shaped society, from the Black Death to today. In a clear and accessible style, Frank M. Snowden reveals the ways that diseases have not only influenced medical science and public health, but also transformed the arts, religion, intellectual history, and warfare. A multidisciplinary and comparative investigation of the medical and social history of the major epidemics, this volume touches on themes such as the

evolution of medical therapy, plague literature, poverty, the environment, and mass hysteria. In addition to providing historical perspective on diseases such as smallpox, cholera, and tuberculosis, Snowden examines the fallout from recent epidemics such as HIV/AIDS, SARS, and Ebola and the question of the world's preparedness for the next generation of diseases.

First published in 1937. The Book of Songs is a collection of ancient Chinese songs, dating from 800 to 600 B.C. Until this was published in 1937 it had not been translated into English since the middle of nineteenth century, when sinology was still in its infancy. For the first time the original meaning of 290 out of the 305 songs is given, use being made of the advances in the study of old Chinese. The result is not merely a clear picture of early Chinese life, but also the restoration to its proper place in world literature of one of the finest collection of traditional songs.

The Archidamian War

Is the history of the modern world the history of Europe writ large? Or is it possible to situate the history of modernity as a world historical process apart from its origins in Western Europe? In Part One of this posthumous collection of essays, Marshall G.S. Hodgson, a former professor of history at the University of Chicago, challenges adherents of both Eurocentrism and multiculturalism to rethink the place of Europe in world history. He argues that the line that connects Ancient Greeks to the Renaissance to modern times is an optical illusion, and that a global and Asia-centered history can better locate the European experience in the shared histories of humanity. In Part Two of the work Hodgson shifts the focus and in a parallel move seeks to locate the history of Islamic civilization in a world historical framework. Finally, in Part Three he argues that in the end there is but one history--global history--and that all partial or privileged accounts must necessarily be resituated in a world historical context. The book also includes an introduction by the editor, Edmund Burke III, contextualizing Hodgson's work in world history and Islamic history.

Connections

Readers learn about the connections among world societies - from regional to global. Connections: A World History is a reader-centered text that focuses on

connections within and among world societies. Concise, engaging chapters and a clear narrative make the often overwhelming amount of information in world history accessible to a wide range of readers. A uniquely comprehensive and consistent map program is combined with strong pedagogical support for increased understandability. The authors' focus on connections offers a useful and compelling framework for understanding how and why peoples and societies change over time. On the Concept of History

A concise survey of the culture and civilization of mankind, *The Lessons of History* is the result of a lifetime of research from Pulitzer Prize-winning historians Will and Ariel Durant. With their accessible compendium of philosophy and social progress, the Durants take us on a journey through history, exploring the possibilities and limitations of humanity over time. Juxtaposing the great lives, ideas, and accomplishments with cycles of war and conquest, the Durants reveal the towering themes of history and give meaning to our own.

The Rise of the West

"I too am not a bit tamed—I too am untranslatable / I sound my barbaric yawp over the roofs of the world."—Walt Whitman, "Song of Myself," *Leaves of Grass*

The American Yawp is a free, online, collaboratively built American history textbook. Over 300 historians joined together to create the book they wanted for their own students—an accessible, synthetic narrative that reflects the best of recent historical scholarship and provides a jumping-off point for discussions in the U.S. history classroom and beyond. Long before Whitman and long after, Americans have sung something collectively amid the deafening roar of their many individual voices. The Yawp highlights the dynamism and conflict inherent in the history of the United States, while also looking for the common threads that help us make sense of the past. Without losing sight of politics and power, *The American Yawp* incorporates transnational perspectives, integrates diverse voices, recovers narratives of resistance, and explores the complex process of cultural creation. It looks for America in crowded slave cabins, bustling markets, congested tenements, and marbled halls. It navigates between maternity wards, prisons, streets, bars, and boardrooms. The fully peer-reviewed edition of *The American Yawp* will be available in two print volumes designed for the U.S. history survey. Volume I begins with the indigenous people who called the Americas home before chronicling the collision of Native Americans, Europeans, and Africans. *The American Yawp* traces the development of colonial society in the context of the larger Atlantic World and investigates the origins and ruptures of slavery, the American Revolution, and the new nation's development and rebirth through the Civil War and Reconstruction. Rather than asserting a fixed narrative of American progress, *The American Yawp* gives students a starting point for asking their own questions about how the past informs the problems and opportunities that we confront today.

Credit Unions and the Credit Union Industry

In this Second Edition of this radical social history of America from Columbus to the present, Howard Zinn includes substantial coverage of the Carter, Reagan and Bush years and an Afterword on the Clinton presidency. Its commitment and vigorous style mean it will be compelling reading for under-graduate and post-graduate students and scholars in American social history and American studies, as well as the general reader.

The Heritage of World Civilizations: Pearson New International Edition

Why did the Peace of Nicias fail to reconcile Athens and Sparta? Donald Kagan examines the years between the signing of the peace treaty and the destruction of the Athenian expedition to Sicily in 413 B.C. The principal figure in the narrative is the Athenian politician and general Nicias, whose policies shaped the treaty and whose military strategies played a major role in the attack against Sicily.

Epidemics and Society

This engaging text offers a brief, readable description of our common Western heritage as it began in the first human societies and developed in ancient Greece and Rome, then through the Middle Ages. Providing a tightly focused narrative and interpretive structure, Brian A. Pavlac covers the basic historical information that all educated adults should know. His joined terms "supremacies and diversities" develop major themes of conflict and creativity throughout history. The text is also informed by five other topical themes: technological innovation, migration and conquest, political and economic decision-making, church and state, and disputes about the meaning of life. Written with flair, this easily accessible yet deeply knowledgeable text provides all the essentials for a course on Western civilization.

Ancient Civilizations and the Bible

'no one else in our times has attempted to write a universal history' Polybius' ambitious goal was to describe how Rome conquered the Mediterranean world in less than fifty-three years. This great study of imperialism takes the reader back to Rome's first encounter with Carthage in 264 and forward to her destruction of that renowned city in 146. Polybius, himself a leading Greek politician of the time, emphasizes the importance of practical experience for the writing of political history as well as the critical assessment of all the evidence. He attributes Rome's success to the greatness of its constitution and the character of its people, but also allows Fortune a role in designing the shape of world events. This new translation by Robin Waterfield, the first for over thirty years, includes the first five books in their entirety, and all of the fragmentary Books 6 and 12, containing Polybius' account of the Roman constitution and his outspoken views on how (and how not) to write history. Brian McGing's accompanying introduction and notes illuminate this remarkable political history. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship,

providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

The Histories

E. H. Gombrich's *Little History of the World*, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the *Little History* brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

Relevant. Accessible. *The West: A Narrative History* is a concise but not abridged introduction to the West, encompassing all cultures that trace their ancestry to the ancient Mediterranean world. It is not a reduced version of a larger study, but a full narrative of the West written concisely. This learning program is built around a Key Question in every chapter, a feature that shows students why western civilization is relevant for them. Students will discover the key questions that define the past are in many ways the same key questions of today. Since students often see conflict between a Christian “West” and an Islamic “East” in today’s society, the authors highlight the ongoing role the Middle East has played in shaping the West. Students will understand the links between people of the West and those in other regions. *The West* is an accessible

program available in several formats to give instructors and students more choices and more ways to save. With the release of the 3rd edition, The West becomes an integrated program tied closely to the new MyHistoryLab. A better teaching and learning experience This program will provide a better teaching and learning experience—for you and your students. Here's how: Personalize Learning — The new MyHistoryLab delivers proven results in helping students succeed, provides engaging experiences that personalize learning, and comes from a trusted partner with educational expertise and a deep commitment to helping students and instructors achieve their goals. Improve Critical Thinking — Each chapter opens with a Key Question and a brief Key Question essay. The Key Question is revisited at the end of the chapter, and MyHistoryLab Icons and Connections features ensure close integration with the new MyHistoryLab. Engage Students — Maps, illustrations, and a biography feature promote discussion of the narrative. Our current world is characterized by life in cities, the existence of social inequalities, and increasing individualization. When and how did these phenomena arise? What was the social and economic background for the development of hierarchies and the first cities? The authors of this volume analyze the processes of centralization, cultural interaction, and social differentiation that led to the development of the first urban centres and early state formations of ancient Eurasia, from the Atlantic coasts to China. The chronological framework spans a period from the Neolithic to the Late Iron Age, with a special focus on the early first millennium BC. By adopting an interdisciplinary approach structured around the concepts of identity and materiality, this book addresses the appearance of a range of key phenomena that continue to shape our world.

The Caribbean before Columbus is a new synthesis of the region's insular history. It combines the results of the authors' 55 years of archaeological research on almost every island in the three archipelagoes with that of their numerous colleagues and

collaborators. The presentation operates on multiple scales: temporal, spatial, local, regional, environmental, social, and political. In addition, individual sites are used to highlight specific issues. For the first time, the complete histories of the major islands and island groups are elucidated, and new insights are gained through inter-island comparisons. The book takes a step back from current debates regarding nomenclature to offer a common foundation and the opportunity for a fresh beginning. In this regard the original concepts of series and ages provide structure, and the diversity of expressions subsumed by these concepts is embraced. Historical names, such as Taino and Lucayan, are avoided. The authors challenge the long-held conventional wisdom concerning island colonization, societal organization, interaction and transculturation, inter- and intra-regional transactions (exchange), and other basic elements of cultural development and change. The emphasis is on those elements that unite the Bahamas, Lesser Antilles, and Greater Antilles as a culture area, and also on their divergent pathways. Colonization is presented as a multifaceted wave-like process. Continuing ties to the surrounding mainland are highlighted. Interactions between residents and new colonists are recognized, with individual histories contingent on these historical interactions. New solutions are offered to the "Huecoid problem" the "Carib problem," the "Taino problem," and the evolution of social complexity, especially in Puerto Rico. These solutions req

What could be more exciting, more exotic or more intrepid than digging in the sands of Egypt in the hope of discovering golden treasures from the age of the pharaohs? Our fascination with ancient Egypt goes back to the ancient Greeks. But the heyday of Egyptology was undoubtedly the nineteenth and early twentieth centuries. This golden age of scholarship and adventure is neatly book-ended by two epoch-making events: Champollion's decipherment of hieroglyphics in 1822 and the discovery of Tutankhamun's tomb by Howard Carter and Lord Carnarvon a hundred years later. In *A World Beneath the Sands*, the acclaimed Egyptologist Toby Wilkinson tells the riveting stories of the men and women whose obsession with Egypt's ancient civilisation drove them to uncover its secrets. Champollion, Carter and Carnarvon are here, but so too are their lesser-known contemporaries, such as the Prussian scholar Karl Richard Lepsius, the Frenchman Auguste Mariette and the British aristocrat Lucie Duff-Gordon. Their work – and those of others like them – helped to enrich and transform our understanding of the Nile Valley and its people, and left a lasting impression on Egypt, too. Travellers and treasure-hunters, ethnographers and epigraphers, antiquarians and archaeologists: whatever their motives, whatever their methods, all understood that in pursuing Egyptology they were part of a greater endeavour – to reveal a lost world, buried for centuries beneath the sands.

Rethinking World History

A Little History of the World

This comprehensive, accessible survey of world history has been extensively

revised to provide an even more global and comparative perspective on the events and processes that have shaped our increasingly interdependent world. Written by leading scholars in their respective fields, *Heritage of World Civilizations, 6/e*, combines unusually strong and thorough coverage of the unique heritage of Asian, African, Islamic, Western, and American civilizations, while highlighting the role of the world's great religious and philosophical traditions. Interactive maps—one Web-based interactive map in each chapter—provides readers with opportunities to explore the relationships between time and space in shaping world history. A three-volume organization (available in A,B,C splits)— Volume A covers antiquity to 1300; Volume B covers the period from 1300-1850; and Volume C covers the Enlightenment to the present. Sixth editions now provide roughly the same amount of coverage for European and non-European regions. Volumes include European events during the High Middle Ages and Renaissance; extensive discussion of globalization, terrorism, and the challenges facing the world in the 21st century; revised coverage of the ancient world—treatment of the origins of humankind has been completely rewritten to reflect the newest scholarship; provides significant new coverage of women in ancient Greece and Rome. For anyone interested in world civilization or world history.

The Heritage of World Civilizations

In the fourth and final volume of his magisterial history of the Peloponnesian War, Donald Kagan examines the period from the destruction of Athens' Sicilian expedition in September of 413 B.C. to the Athenian surrender to Sparta in the spring of 404 B.C. Through his study of this last decade of the war, Kagan evaluates the performance of the Athenian democracy as it faced its most serious challenge. At the same time, Kagan assesses Thucydides' interpretation of the reasons for Athens' defeat and the destruction of the Athenian Empire.

Taureans, ever wondered what the Sun-signs tell you about love and life? This unique anthology of poems for love and life relates directly to your Sun-sign, Taurus. If you were born between the 21st of April and the 21st of May, you will relate to many of the themes identified with your sign's characteristics and personality traits. The poems in this collection have been chosen because they reflect a Taurean attitude to life. They appeal to the interests 'ruled' by your sign; the animals, flowers, trees, plants and places celebrated by the poets and associated with the sign of Taurus over three thousand years of traditional astrology. Some have been chosen simply because we believe you will enjoy them, and that they will awaken or re-awaken your love of poetry.

The Fall of the Athenian Empire

This book, the second volume in Donald Kagan's tetralogy about the Peloponnesian War, is a provocative and tightly argued history of the first ten years of the war. Taking a chronological approach that allows him to present at each stage the choices that were open to both sides in the conflict, Kagan focuses on political, economic, diplomatic, and military developments. He evaluates the strategies used by both sides and reconsiders the roles played by several key individuals.
