ASME Technical Papers

Paper

Annotation Volumes 2A and 2B of the five-volume set comprising the proceedings of the June 2002 conference contain approximately 135 contributions discussing all types of gas engines, in particular, their controls, diagnostics, and instrumentation; cycle

innovations; marine engines; and oil and gas applications. A sampling of topics: automated fault diagnosis for small gas turbine engines; noise reduction from engine tests at airports; comparison of blade cooling performance using alternative fluids; and limits and trade-off in the control of compressor surge. There is no subject index. Annotation c. Book News, Inc., Portland, OR (booknews.com).

Modern Maintenance Management

Occupational Conversion Manual

SV. Sound and Vibration

Chronicles the development, production, and application of what was arguably the finest aircraft piston engine ever produced - the Pratt & Whitney R-2800.

Technology Report and Product Directory, Land, Sea & Air

Jet Engine Test Cells

From November 1990 through the end of February 1991, six carrier battle groups and two Marine air wings operated simultaneously in Southwest Asia in Operation Desert Shield/Storm (ODS/S). This massive deployment of Naval and marine aviation units put

pressure on the Naval supply system to provide needed parts and supplies. Since certain items, such as jet engines, were particularly susceptible to breakdowns in the harsh desert environment in which the forces were operating, some divisions of the Naval aviation depots (NADEPs) were tasked to 'surge' selected repairs to provide the theater with spare end items and repair parts. One such division was the engine shop at NADEP North Island (San Diego, CA) which, among other tasks, was asked to surge its repair of T64 jet engines, the engines used in CH-53 helicopters. This Note focuses on the surge-related problems faced at North Island and on the management adaptations, particularly in materiel support, devised there in response. We visited North Island to discuss the production surge. To put North Island's experience in its proper context, we also visited the NADEPs at Cherry Point, NC, at Jacksonville, FLA, and at Norfolk, VA, as well as the Naval Air Systems Command in Washington, D.C., and the Aviation Supply Office in Philadelphia, PA.

Atmospheric Pollution by Aircraft Engines

For more than a half century, the Guide to the Evaluation of Education Experiences in the Armed Services has been the standard reference work for recognizing learning acquired in military life. Since 1942, ACE and has worked cooperatively with the US Department of Defense, the Armed Services, and the US Coast Guard in helping hundreds of thousands of individuals earn academic credit for learning achieved while serving their country.
