Learning how to bid lawn care and landscaping jobs, when you are just getting your business started, is a huge task. Most of the times, those in the know aren't going to share with you all the lessons they've learned and the tips they have picked up over the years. But I will. I operate one of the largest lawn care business forums on the internet, The Gopher Lawn Care Business Forum. On that site I have interviewed thousands upon thousands of lawn care business owners over the past decade. Throughout this process, I have learned a lot. All that I have learned, I want to share with you. The goal of this book is to give you, the lawn care business owner, a working knowledge of the entire bidding process for most of the jobs you are going to be called upon to bid. To give you a better idea on how to go about bidding jobs, services you can upsell, how to upsell, and how to perform those jobs. This book is somewhat large at close to 600 pages but I really wanted to include a lot of information. Read it at your own pace and later you can use it for years to come as a reference manual. Keep going back to this book over time, to get more ideas on how to improve your business. After your reading, I feel confident you and your business are going to be in a better place. Legacy of Excellence

By far the biggest change to The UK Pesticide Guide in 2020 is the loss of a number of active ingredients that have been fundamental to many crop protection programmes. The final use-up of chlorothalonil formulations; propiconazole, fenpropimorph, chloridazon and diquat occurs in 2020 but there are also a few exciting new additions. Aclonifen is a new residual herbicide for use in potatoes that already has a number of EAMUs for use in minor crops. BASF is launching its new triazole, mefentrifluconazole, which promises to restore full triazole activity, at least initially. On the insecticide front the new active ingredient from Corteva agriscience, sulfoxaflor, is now listed for use in Cucurbitae and ornamentals under full protection for control of aphids and whitefly.

Could our sense of who we are really turn on a sliver of DNA? In our multiethnic world, questions of individual identity are becoming increasingly unclear. Now in **ABRAHAM'S CHILDREN** bestselling author Jon Entine vividly brings to life the profound human implications of the Age of Genetics while illuminating one of today's most controversial topics: the connection between genetics and who we are, and specifically the question "Who is a Jew?" Entine weaves a fascinating narrative, using breakthroughs in genetic genealogy to reconstruct the Jewish biblical tradition of the chosen people and the hereditary Israelite priestly caste of Cohanim. Synagogues in the mountains of India and China and Catholic churches with a Jewish identity in New Mexico and Colorado provide different patterns of connection within the tangled history of the Jewish diaspora. Legendary accounts of the Hebrew lineage of Ethiopian tribesmen, the building of Africa's Great Zimbabwe fortress, and even the so-called Lost Tribes are reexamined in light of advanced DNA technology. Entine also reveals the shared ancestry of Israelites and Christians. As people from across the world discover their Israelite roots, their riveting stories unveil exciting new approaches to defining one's identity. Not least, Entine addresses possible connections between DNA and Jewish intelligence and the controversial notion that Jews are a "race apart." **ABRAHAM'S CHILDREN** is a compelling reinterpretation of biblical history and a challenging and exciting illustration of the promise and power of genetic research.
