twentieth: namely, the building of rail tunnels under the Hudson River linking New Jersey and New York. These tunnels remain in service today-although one is temporarily out of service since its Manhattan terminal was under the World Trade Center-and are the only rail crossings of the Hudson in the metropolitan area. Two of the tunnels were built by the Hudson and Manhattan Railroad, a company headed by William Gibbs McAdoo, a man who later served as U.S. Secretary of the Treasury and even mounted a campaign for the Democratic presidential nomination at one point. McAdoo's H&M remains in service today as the PATH System of the Port Authority of New York and New Jersey. The other tunnel was opened in 1910 by the Pennsylvania Railroad, led to the magnificent Penn Station on Eighth Avenue and 33rd Street, and remains in daily service today for both Amtrak and New Jersey Transit. The author has updated this new edition with additional photographs, a concluding chapter on recent developments, and a Preface that recounts the last trains of September to the World Trade Center Terminal.

A masterpiece of modernist fiction that creates a vividly impressionistic portrait of a teeming and multi-faceted New York City. In a series of overlapping stories, John Dos Passos's *Manhattan Transfer* takes us from the Gilded Age to the Jazz Age in a narrative collage that brings the complexity of the urban environment to life. From Wall Street to the waterfront, from the Bowery to the Village, from the city's grand avenues to its gritty alleys, its wealthy power brokers and its struggling immigrants, this kaleidoscopic novel conveys the restless energy of life in Manhattan. The innovative novelistic techniques Dos Passos used, marked by flashbacks, stream of consciousness, and a cinematic perspective, would go on to inspire a new school of writing. Almost a century after it was written, *Manhattan Transfer* remains an indelible tribute to the contradictions of the American dream.

Goldsmith challenges the view that nature is absent in the modern urban novel, and interprets the phrase the interweaving of physical description and symbolism, metaphor and characterization, and theme and imagery that give internal form to external narrative. He provides a textual analysis of seven 20th- century American novels: Manhattan transfer, Studs Lonigan, Call it sleep, The Dollmaker, The Assistant, The Pawnbroker, and Mr. Sammler's planet.
