The World Guide to Automobile Manufacturers

The story of how Chrysler's minivan team created an automobile that captured the 1995 Motor Trend Car of the Year and other major awards - and reinvented a perilously entrenched corporation in the process - is as dramatic and inspiring a

story as any in business today. Brock Yates, one of the most respected writers in the auto world, was given unprecedented access to Chrysler - every planning session, presentation, budget review, test drive, assembly line start-up, and marketing launch. The result is a book that unveils the mysteries of modern car-making, revealing how cars are shaped through countless interlinked decisions ranging from size and power to door configurations, color selections, and innumerable other interconnected details. It also captures the complex process by which the thousands of separate pieces that make up a car are designed, tested, manufactured, and marshaled into place at the exact moment they are needed. For any reader who cares about cars, this is the most intriguing look inside the mysteries of their creation ever written. At the same time, The Critical Path recounts an extraordinary drama of all-too-human managers attempting to make something new, in a new way, inside a corporate culture that resists them at every turn. The story of how Chrysler's minivan platform team kept their commitment to quality, schedule, and budget - with a $3 billion investment and the company's fate palpably in the balance - is as encouraging a tale as has emerged from American business in years. The unprecedented triumph and Chrysler's resultant comeback is a lesson in successful management that will be savored by any reader interested in how great companies make breakthroughproducts.

Rifling Through My Drawers

In this book, Steven Feuerstein, widely recognized as one of the world's experts on the Oracle PL/SQL language, distills his

many years of programming, writing, and teaching about PL/SQL into a set of PL/SQL language "best practices"--rules for writing code that is readable, maintainable, and efficient. Too often, developers focus on simply writing programs that run without errors--and ignore the impact of poorly written code upon both system performance and their ability (and their colleagues' ability) to maintain that code over time.Oracle PL/SQL Best Practices is a concise, easy-to-use reference to Feuerstein's recommendations for excellent PL/SQL coding. It answers the kinds of questions PL/SQL developers most frequently ask about their code: How should I format my code? What naming conventions, if any, should I use? How can I write my packages so they can be more easily maintained? What is the most efficient way to query information from the database? How can I get all the developers on my team to handle errors the same way? The book contains 120 best practices, divided by topic area. It's full of advice on the program development process, coding style, writing SQL in PL/SQL, data structures, control structures, exception handling, program and package construction, and built-in packages. It also contains a handy, pull-out quick reference card. As a helpful supplement to the text, code examples demonstrating each of the best practices are available on the O'Reilly web site.Oracle PL/SQL Best Practices is intended as a companion to O'Reilly's larger Oracle PL/SQL books. It's a compact, readable reference that you'll turn to again and again--a book that no serious developer can afford to be without.

F Power Mode Fitness Systematic workout Program for no doubt gives you the best results to achieving a fit body but challenging yourself with new exercises and workouts is a different discussion. When your body gets used to a specific workout program, it loses its effectiveness. For example if you do sit-ups every day in a month and increase the number of reps as days pass, not only it doesn't help your body to burn fats and build muscles, but it makes this exercise easy for your body and it loses its effectiveness. If you always get your body in to new challenges and learn more exercises, for sure, your body is going to be fit. In this book we challenge you and your body to new workouts and exercises. All of the body parts, legs, abs, and upper body have been categorized in their own section and each section consists of steps. Each step is different from each other and is a challenge for you. From step 1 as you go forward you face new exercises and different levels of reps for each exercise which has been divided to 3 Modes: Minimum, Middle, and Maximum. Each step is a prerequisite for the next one. If you find a step hard, don't rush ahead to the next step. Just practice this one in your

workout till you get comfortable with it and then go for the next step. Choose your Specific Body Type workout program that suits your body. Follow along with our workout program and know that if you are serious to be fit, you are in the right way. Remember, always challenge yourself. From the resumption of automobile production at the close of World War II through the 1950s, the American auto industry would see the births and deaths of several manufacturers, great technological advances, and an era of dramatic styling as a prospering nation asserted its growing mobility. Cars of this period are among the most iconic vehicles ever built in the United States: the 1949 Ford, the remarkable Studebaker designs of 1950 and 1953, the 1955–1957 Chevrolets, the "Forward Look" Chrysler products, the ill-fated Edsel and many others. This comprehensive reference book details every model from each of the major manufacturers (including independents such as Kaiser-Frazer and Crosley but excluding very low-volume marques such as Tucker) from model years 1946 through 1959. Year by year, it provides an overview of the industry and market, followed by an individual report on each company: its main news for the year (introductions or cancellations of models, new engines and transmissions, advertising themes, sales trends etc.); its production figures and market status; and its powertrain offerings, paint colors and major options. The company's models are then detailed individually with such information as body styles, prices, dimensions and weights, standard equipment and production figures. Nearly 1,000 photographs are included.

On the eve of a White House run, Sidel cleans up a mess in his old backyardTired of being led by weaklings, the American people have fallen in love with J. Michael Storm and Isaac Sidel, the lawyer and the New York mayor who saved the country from the worst baseball strike in history. The Democratic National Convention is at Madison Square Garden, and when

Storm is nominated for the presidency, he's going to put the eccentric, gun-toting Sidel at the bottom of the ticket. But before Sidel can take his shot at the White House, he has a few loose ends to tie up. He's most preoccupied with a father-and-son detective team suspected of running a murder-for-hire operation that went south, resulting in the father shooting his son. Sidel suspects there's more to the story, and until he's gotten to the bottom of it, the vice presidency will have to wait.

The ultimate insider's guide to Los Angeles Features interesting and unusual places not found in traditional travel guides 'In Los Angeles, everyone is a star.' - Denzel Washington For more than a century, seekers of sun and celebrity from around the world have flocked to this sprawling metropolis on the Pacific, which Dorothy Parker once described as '72 suburbs in

search of a city.' But beyond the red-carpet reputation and Tinseltown trappings is a west coast wonderland teeming with unexpected cultural experiences, iconic architecture, gorgeous open spaces, quirky museums, hidden vistas, unconventional art, and obscure stories about the starlets, moguls, personalities, and players who have made Los Angeles their playground. This unusual guidebook explores 111 of the city's most interesting and unknown places and experiences: wander a serpentine path in a spiritual quest of your own making; channel your inner cowboy at a tried and true honky tonk bar; pay homage to the Dude at the bungalow where the big Lebowski lived; turn your car tires into musical instruments on the country's only 'musical' road; sleep with the ghosts of Marilyn Monroe and Charlie Chaplin; view a constellation of stars more vivid than anything Hollywood Boulevard has to offer. From the San Gabriel Mountains to the Pacific Ocean, Angelenos and vistors will fall in love with the real Los Angeles. Adventures beckon. Surprises await. The story of the Soviet Union's cars has to be seen in the context of a planned society in which everything was planned well in advance, and consumer items were not a priority until well after the Second World War. This extraordinarily detailed study charts the history of Soviet cars from the birth of the Soviet Union in 1917 until its demise in 1990, with a conclusion about the post-Soviet era. It is the story of an insular, state-run car industry in which the carefully thought-out ideas of ministerial planners, rather than fickle customers in a free market, determined what cars were made in a country where the open road was often a 300-mile track across a windswept steppe.

A powerful wake-up call to all Americans With only 6 percent of the world's population, how long will the United States remain a global superpower? The answer, David Boren tells us in A Letter to America, depends on asking ourselves tough questions. A powerful wake-up call to Americans, A Letter to America, forces us to take a bold, objective look at ourselves. In A Letter to America, Boren explains with unsparing clarity why the country is at a crossroads and why decisive action is urgently needed and offers us an ambitious, hopeful plan. What the country needs, Boren asserts, are major reforms to restore the ability of our political system to act responsibly. By relying on our shared values, we can replace cynicism with hope and strengthen our determination to build a better future. We must fashion a post–Cold War foreign policy that fits twenty-first-century realities—including multiple contending superpowers. We must adopt campaign finance reform that curbs the influence of special interests and restores political power to the voters. Universal health care coverage, budget deficit reduction, affordable higher education, and a more progressive tax structure will strengthen the middle class. Boren also describes how we can renew our emphasis on quality primary and secondary education, revitalize our spirit of community, and promote volunteerism. He urges the teaching of more American history and government, for without educated citizens our system cannot function and our rights will not be preserved. Unless we understand how we became great, we will not remain great. The plan Boren puts forward is optimistic and challenges Americans to look into the future, decide what we want to be and where we want to go, and then implement the policies and actions we need to take us there.
