A boy (Romeo) and a girl (Juliet) fall in love. But they come from families which hate each other, and know they will not be allowed to marry. They are so much in love they marry in secret instead. However, before their wedding night Romeo kills Juliet's cousin in a duel, and in the morning he is forced to leave her. If he ever returns to the city, he will be put to death. Juliet is then told she must marry Paris, who has been chosen by her parents, who do not know she is already married. She refuses - then agrees because she plans to fake her death and escape to be with Romeo. She takes a sleeping potion and appears to be dead, so her parents lay her in a tomb. However, Romeo does not know about the plan, visits her grave, finds her 'dead', and kills himself. Juliet finally wakes up, finds Romeo dead, and then kills herself. This is just the basic story. There are lots of extra characters and details you can include. However, do not fall into the trap of retelling the story in your work. No GCSE task will ask you to write out the story of Romeo and Juliet, and no marker will expect you just to outline the events in the play. Instead, use the plot to support your work and ideas. Next, let's have a look at how you can do this

The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices

we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.

### **Collections 2017, Grade 9**

With its roots deep in ancient narrative and in various reworkings from the late medieval and early modern period, Shakespeare's Romeo and Juliet has left a lasting trace on modern European culture. This volume aims to chart the main outlines of this reception process in the broadest sense by considering not only critical-scholarly responses but also translations, adaptations, performances and various material and digital interventions which have, from the standpoint of their specific local contexts, contributed significantly to the consolidation of Romeo and Juliet as an integral part of Europe's cultural heritage. Moving freely across Europe's geography and history, and reflecting an awareness of political and

cultural backgrounds, the volume suggests that Shakespeare's tragedy of youthful love has never ceased to impose itself on us as a way of articulating connections between the local and the European and the global in cases where love and hatred get in each other's way. The book is concluded by a selective timeline of the play's different materialisations.
