Rubank Elementary Method

One man's photographic journey through the human condition helps us to see ourselves and our world in a whole new way Over the last twenty years, photographer Bill Voxman has traveled the world with his wife, Joanne, documenting the human condition from Bhutan to Peru, Armenia to Italy. Through his stunning black-and-white images, Voxman has set out to "bring to light such diverse universal aspects of the human condition as joy, contemplation, alienation, socialization, bravery, and desperation--features that transcend geographic boundaries." The results of Voxman's worldwide journey are found in this poetic collection, *The Human Condition*. "I hope that the images in this book will contribute to a greater understanding of and pleasure in the shared humanity that unites us," the photographer writes. Intimate and moving, *The Human Condition* reminds us that we each have an important part to play in the drama we call "humanity."

journey by teaching with segmented presentation of new concepts and introducing ensemble playing. Isolating concepts and teaching them individually helps facilitate understanding of the more advanced material. Following the unique Sound Innovations organization, the book contains four levels, each of which is divided into several sections that introduces concepts separately and provides plenty of practice and performance opportunities to reinforce each lesson. Visit www.alfred.com/soundinnovations for more information. "Sound Innovations by Alfred Music is a dream-come-true method for beginning concert band and string orchestra. Its infusion of technology provides an open-ended architecture of the first order. This unique blend of time-tested strategies and technology offer a great foundation for a successful learning experience." ---John Kuzmich, Jr., BandDirector.com This title is available in SmartMusic.

Rubank Advanced Method, Volume 1-French Horn

First to be published in the series was *The Art of French Horn Playing* by Philip Farkas, now Distinguished Professor Emeritus of Music at Indiana University. In 1956, when Summy-Birchard published Farkas's book, he was a solo horn player for the Chicago Symphony and had held similar positions with other orchestras, including the Boston Symphony, Cleveland Orchestra, and Kansas City Conservatory, DePaul University, Northwestern University, and Roosevelt University in Chicago. *The Art of French Horn Playing* set the pattern, and other books in the series soon followed, offering help to students in learning to master their instruments and achieve their goals.

The Canadian Brass Book

Just how does a brass quintet from Toronto become the most traveled classical act on the scene today? The Canadian Brass, called "The Marx Brothers of Brass" by the New York Times, has been cheered in concerts around the world for over 20 years. Their nearly 30 albums define them as the most successful crossover group in history. This fascinating look into the makings of a musical institution is a story to be enjoyed by musicians and music lovers. Flavored with the whimsy that has become the trademark of the group, the book is an amusing romp through their career, featuring a revealing look into the recording industry, extensive interviews with each player, dozens of amusing anecdotes, and over a hundred photos.

The Black Horn: The Story of Classical French Hornist Robert Lee Watt tells the story of the first African American French Hornist hired by a major symphony in the United States. Today, few African Americans hold chairs in major American symphony orchestras, and Watt is the first in many years to write about this uniquely exhilarating—and at times painful—experience. The Black Horn chronicles the upbringing of a young boy fascinated by the sound of the French horn. Watt walks readers through the many obstacles of the racial climate in the United States, both on and off stage, and his efforts to learn and eventually master an instrument little considered in the African American community. Even the author’s own father, who played trumpet, sought to dissuade the young classical musician in the making. He faced opposition from within the community—where the instrument was deemed by Watt’s father a “middle instrument suited only for thin-

lipped white boys”—and from without. Watt also documented his struggles as a student at a nearly all-white major music conservatory, as well as his first job in a major symphony orchestra after the conservatory canceled his scholarship. Watt subsequently chronicles his triumphs and travails as a musician when confronting the realities of race in America and the world of classical music. This book will surely interest any classical musician and student, particularly those of color, seeking to grasp the sometimes troubled history of being the only “black horn.”

Intermediate scales and bowings

The second book of Practical Studies is designed to logically extend the techniques already presented in the First Book and also to introduce and develop new techniques and rhythms that will offer a challenge to the intermediate student. Through the use of slightly more difficult and more extended studies, it is hoped that the material included in this book may more fully develop general musicianship and more feeling for style and interpretation and thus act as a foundation for solo literature.
