Empowerment Series: Understanding Human Behavior and the Social Environment

This text focuses on the skills social workers use in the helping process. It defines, illustrates, and teaches helping skills and provides manageable models for understanding them. The book also looks at the underlying process and its associated set of core skills. A range of helping situations are addressed so that social workers can find useful models to incorporate into their own work. The core

"Wish you knew exactly what to say in awkward social situations? Do you want a formula for charisma? Do you want to know exactly what to say to your boss, your date, or your mother-in-law? You need to know how people work. As a human behavior investigator, Vanessa Van Edwards studies the hidden forces that drive our behavior patterns in her lab--and she's cracked the code. In *Captivate* she shares a wealth of valuable shortcuts, systems and behavior hacks for taking charge of their interactions at work, at home, and in any social situation. These aren't the people skills you learned in school. This is the first comprehensive, science backed, real life manual on human behavior and a completely new approach to building connections. Just like knowing the right formulas to use in chemistry, or the right programming language to write code, the hacks in this book are simple ways to solve for people. For example: -The Social Game Plan: Every party, networking event and social situation has a predictable map - discover how to work a room and the sweet spot for making the most connections. -The 7 Microexpressions: Learn how to speed-read the 7 universal facial expressions and how they can be used to predict people's emotions. -Conversation Sparks: All conversations can be hacked--if you know how certain words generate dopamine in the people you meet. When you understand the laws of human behavior you can get along with

anyone, and your influence, impact, and income will increase as a result. What's more, you will improve your interpersonal intelligence, make a killer first impression, and build rapport quickly and authentically in any situation--negotiations, interviews, parties, and pitches. You will never interact in the same way again"--

THE SOCIAL WORK SKILLS WORKBOOK, Eighth Edition, enables students to develop proficiency in professionalism and the essential social work skills. Each skill supports one or more of the 43 knowledge and value statements and the 31 practice behaviors that elaborate the core competencies in the 2015 EPAS of the CSWE. The skills also align with nationally standardized licensing exams. The text includes expository content grounded in contemporary research, assessment tools and processes, and strong experiential components that help students get a realistic sense of the field. Case examples, summaries, and skill-building exercises cultivate students' professionalism and expertise as confident, ethical, and effective helpers. Current social issues are evident throughout. The book can be used as a main text in social work skills labs, a resource for field or internship courses, or a supplement to social work methods and practice courses. "This practical, politically neutral book offers concrete skills for holding meaningful conversations that cut across today's intense political divide, showing readers how to connect to the people in their lives. Political polarization is at an all-time high, and the consequences for our personal relationships are significant. Many people have friends and family members with whom they feel they can no longer communicate because of their extreme political views. In this book, psychologist Tania Israel presents her program for helping people have meaningful, constructive conversations with those they disagree with politically. Chapters show readers how to develop and use the scientifically-proven skills that are the foundation of constructive conversation, including strategies for effective listening, managing emotions, and understanding someone else's perspective, as well as finding common ground, avoiding self-righteousness, and telling your own story. Throughout, conversation prompts, practical exercises, case examples, and self-quizzes help readers visualize and practice starting, sustaining, and ending challenging conversations"--

Helping People Change

`This book encourages all those working with children with speech, language and

communication needs to develop their creativity within a model of child-centred reflective practice, acknowledging that our interaction with children has an effect at many different levels. Therapists, teachers, teaching assistants and parents will find a wealth of practical suggestions and a solid foundation of research within these pages.' Mary Hampton, Chair, Association of Speech and Language Therapists in Independent Practice (ASLTIP), UK For many children, the act of communication that most of us take for granted can be a struggle, and communicating with others can become something to fear rather than enjoy. This creative book is full of fun and imaginative ideas to help children aged 4-11 with a speech or language delay or disorder to develop their communication abilities and skills. It is packed with activities and games tailored to help develop abilities such as effective listening, imagination and perseverance, and to build specific skills such as formulation of questions, categorising, taking turns and understanding non-verbal communication. Tips for personalising and shaping the activities are provided. A comprehensive theory section also covers how play can be a therapeutic tool for enhancing communication, and how to structure the emotional environment. Practical advice on working with groups and individuals and in different settings is also given. This activity book is an invaluable resource not only for speech and language therapists and students, but also for parents, teachers, carers and other support staff who are looking for creative ways to promote speech and language development. Deborah M. Plummer is a speech and language therapist and imagework practitioner with over 20 years' experience of facilitating

#1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Don't miss the hourlong Netflix special Brené Brown: The Call to Courage! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When

we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with

your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read *Daring Greatly* and *Rising Strong* or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership.

Community-Based Psychological First Aid: A Practical Guide to Helping Individuals and Communities during Difficult Times presents a practical method for helping those in need in difficult times. No advanced training in psychology is needed to use it. Injuries from disasters, terrorist events, and civil unrest are not just physical. These events also cause psychological trauma that can do lasting damage. Psychological First Aid (PFA) draws on human resilience and aims to reduce stress systems and help those affected recover. It is not professional psychotherapy, and those providing this kind of aid do not need a degree to help. Gerard Jacobs has developed this community-based method of delivering PFA over 20 years and has taught it in over 30 countries. Along with the easy-to-follow method, Jacobs includes examples of how this works in action in different situations, and presents scenarios to practice. Unique in its approach of community

Don't simply show your data—tell a story with it! *Storytelling with Data* teaches you the fundamentals of data visualization and how to communicate effectively with data. You'll discover the power of storytelling and the way to make data a pivotal point in your story. The lessons in this illuminative text are grounded in theory, but made accessible through numerous real-world examples—ready for immediate application to your next graph or presentation. Storytelling is not an inherent skill, especially when it comes to data visualization, and the tools at our disposal don't make it any easier. This book demonstrates how to go beyond conventional tools to reach the root of your data, and how to use your data to create an engaging, informative, compelling story. Specifically, you'll learn how to:

- Understand the importance of context and audience
- Determine the appropriate type of graph for your situation
- Recognize and eliminate the clutter clouding your information
- Direct your audience's attention to the most important parts of your data
- Think like a designer and utilize concepts of design in data visualization
- Leverage the power of storytelling to help your message resonate with your audience

Together, the lessons in this book will help you turn your data into high impact visual stories that stick with your audience. Rid your world of ineffective graphs, one exploding 3D pie chart at a time. There is a story in your data—*Storytelling with Data* will give you the skills and power to tell it!

Bestselling author Sherman Alexie tells the story of Junior, a budding cartoonist growing up on the Spokane Indian Reservation. Determined to take his future into his own hands, Junior leaves his troubled school on the rez to attend an all-white farm town high school where the only other Indian is the school mascot. Heartbreaking, funny, and beautifully written, *The Absolutely True Diary of a Part-Time Indian*, which is based on the author's own experiences, coupled with poignant drawings by Ellen Forney that reflect the character's art, chronicles the contemporary adolescence of one Native American boy as he attempts to break away from the life he was destined to live. With a forward by Markus Zusak, interviews with Sherman Alexie and Ellen Forney, and four-color interior art throughout, this edition is perfect for fans and collectors alike.

How can teachers make sure that all students gain the reading skills they need to

be successful in school and in life? In this book, Karen Tankersley describes the six foundational "threads" that students need to study in order to become effective readers: phonemic awareness, phonics and decoding, vocabulary, fluency, comprehension, and higher-order processing. For each area, the author explains how students acquire the reading skills they need and offers a series of skill-building strategies and activities that teachers can use in the classroom. Although reading is perhaps most intensely taught in the kindergarten and 1st-grade classrooms, Tankersley emphasizes that helping students become lifelong readers is a task for all teachers, including content-area teachers in middle and high schools. The Threads of Reading addresses key questions about literacy, such as * What makes a difference in reading achievement? * How much reading time is enough? * How can teachers use writing to build reading skills? * How can teachers help students make meaning from their reading? The strategies in this book address many situations, from individual instruction to small- or large-group instruction, from kindergarten to high school. Teachers will appreciate the multitude of activities provided, and administrators will learn to better evaluate the reading programs in place in their districts and schools. Grounded in both research and "teacher lore" from actual classrooms, this book is a solid guide to helping students become lifelong readers. Chang, Scott, and Decker's multilayered teaching and learning system presents a creative blend of learning methods and clear presentation of topics to help students think like practitioners and apply foundational skills to real-world practice. Students first read about professional practice and the skills required to work effectively with clients. Students then think and write about the ideas and concepts presented in the text by completing homework exercises following each new concept. Next, students watch and discuss the accompanying DVD (available for packaging with the text), which demonstrates how to use the skills covered in the text with an individual, family, or group. Furthermore, the text's modified case-based method introduces a continuing case, one section at a time, throughout the chapters, which helps students learn how to think like professionals. Finally, exercises with specific directions for role-playing the client, practitioner, and peer supervisor, followed by a simple evaluation tool completed by the peer supervisor and practitioner, promote practice and evaluation. The Innovator's DNA

Empowerment Series: The Skills of Helping Individuals,

Families, Groups, and Communities, Enhanced

First released in the Spring of 1999, *How People Learn* has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do—with curricula, classroom settings, and teaching methods—to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. *How People Learn* examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing

learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

The Skills of Helping Individuals, Families, Groups and Communities

You're trying to help--but is it working? Helping others is a good thing. Often, as a leader, manager, doctor, teacher, or coach, it's central to your job. But even the most well-intentioned efforts to help others can be undermined by a simple truth: We almost always focus on trying to "fix" people, correcting problems or filling the gaps between where they are and where we think they should be. Unfortunately, this doesn't work well, if at all, to inspire sustained learning or positive change. There's a better way. In this powerful, practical book, emotional intelligence expert Richard Boyatzis and Weatherhead School of Management colleagues Melvin Smith and Ellen Van Oosten present a clear and hopeful message. The way to help someone learn and change, they say, cannot be focused primarily on fixing problems, but instead must connect to that person's positive vision of themselves or an inspiring dream or goal they've long held. This is what great coaches do--they know that people draw energy from their visions and dreams, and that same energy sustains their efforts to change, even through difficult times. In

contrast, problem-centered approaches trigger physiological responses that make a person defensive and less open to new ideas. The authors use rich and moving real-life stories, as well as decades of original research, to show how this distinctively positive mode of coaching—what they call "coaching with compassion"—opens people up to thinking creatively and helps them to learn and grow in meaningful and sustainable ways. Filled with probing questions and exercises that encourage self-reflection, *Helping People Change* will forever alter the way all of us think about and practice what we do when we try to help.

In *How Children Succeed*, Paul Tough introduced us to research showing that personal qualities like perseverance, self-control, and conscientiousness play a critical role in children’s success. Now, in *Helping Children Succeed*, Tough takes on a new set of pressing questions: What does growing up in poverty do to children’s mental and physical development? How does adversity at home affect their success in the classroom, from preschool to high school? And what practical steps can the adults who are responsible for them take to improve their chances for a positive future? Tough once again encourages us to think in a new way about the challenges of childhood. Mining the latest research in psychology and neuroscience, he provides us with insights and strategies for a new approach to childhood adversity, one designed to help many more children succeed. * (Kirkus Reviews)
