Keynote

A reader's fictional tour of the art and lives of some of the great 20th-century Surrealists. An author (a version of Vila-Matas himself) presents a short "history" of a secret society, the Shandies, who are obsessed with the concept of "portable literature." The society is entirely imagined, but in this rollicking, intellectually playful book, its members include writers and artists like Marcel Duchamp, Aleister Crowley, Witold Gombrowicz, Federico García Lorca, Man Ray, and Georgia O'Keefe. The Shandies meet secretly in apartments, hotels, and cafes all over Europe to discuss what great literature really is: brief, not too serious, penetrating the depths of the mysterious. We witness the Shandies having adventures in stationary submarines, underground caverns, African backwaters, and the cultural capitals of Europe.

The C-ORAL-ROM book and DVD provide a unique set of comparable corpora of spontaneous speech for the main Romance languages, French, Italian, Portuguese and Spanish. The corpora are accompanied by comparative linguistic studies, models and standard linguistic measures of spoken language variability. Each corpus is built to the same design using identical sampling techniques, and each corpus is presented in multimedia format, allowing simultaneous access to aligned acoustic and textual information. Texts are headed with information about provenance, participants, etc. and the transcriptions show changes of speaker. Speech acts are tagged according to the evidence of prosodic criteria. Each corpus totals 300,000 words and presents formal and informal speech in a variety of contexts of use, dialogue structure and text genres, semantic domains and speech act typologies. The corpora have great statistical relevance for spoken language structures and can address key issues in human language technology such as speech recognition in unrestricted discourse, the suitability of speech synthesis in natural prosody, and multilingual applications of the spoken language interface. The work provides new data and innovative theoretical perspectives that are relevant for corpus linguistics, romance linguistics, syntactic theory, speech and prosody research, and second language acquisition.

Horacio Quiroga alcanzó gran repercusión entre la crítica y el público continental. Los cuentos aquí reunidos -aparecidos originalmente en publicaciones porteñas en los años anteriores- dan cuenta de un amplio periodo de su experiencia narrativa y vital: los primeros años en Buenos Aires, el deslumbramiento por la cinematografía, sus proyectos agrícolas en el Chaco, la profunda incursión en Misiones, el regreso a la capital. El relato epónimo es, quizás, uno de los más conocidos de la literatura latinoamericana. A través de sus páginas, quedan

patente la admiración y la maravilla que sentía Quiroga por la selva y sus criaturas, al narrar magistralmente el encuentro de Anaconda con la bestia más temible de todas: el hombre

To explain a text, according to Rodriguez, is to locate it precisely at a real historical conjuncture, to situate it ideologically. This insistence on the historicity of literature saved Rodriguez from the fate that, from the late 1970s onward, overtook many Althusserians. The latter, unable to historicise and therefore transcend the key category of the subject, refused to rank 'real art' among the ideologies, as a result of which their concept of literary 'production' remained locked in a Kantian- and therefore eminently bourgeois- problematic. For Rodriguez, in contrast, ideology could not be the discourse of the subject, for the simple reason that the subject was itself an historical category, whose origins were to be found in animism, the ideology of the bourgeoisie during its early, mercantilist phase. As an emergent ideology, animism stood in contradiction to substantialism, its dominant counterpart under feudalism, that manifestly had no place for a 'free subject'. The analysis of these conflictual ideologies, during the protracted transition in Spain from feudalism to capitalism, constitutes the kernel of Theory and History of Ideological Production. This volume brings together 18 case studies investigating territory in the Middle Ages from an archaeological perspective. It offers contributions from prestigious

professors, such as Flocel Sabaté and Jesús Brufal, and a selected set of young researchers. It promotes new perspectives on territory studies through innovative research methods. The case studies are organized chronologically from the end of the Roman Empire to the end of the Middle Ages, focusing especially on cases in Portugal, Spain and Italy, in order to provide a Mediterranean perspective. The volume explores a range of topics, from aspects of methodological informatics in the valley of Ager in Catalonia, the evolution of prosperous cities in the Middle Ages (such as Braga, Pisa and Milan), the transformation of the early medieval rural space to the long evolution of island territories (Sardinia), and the influence of the military actions, the political power and the religious architecture on the landscape in the Iberian and the Italian Peninsula, among other topics. As such, this publication offers a variety of new insights into the study of medieval territory.

Herodotus in Context

Compact Cinematics challenges the dominant understanding of cinema to focus on the various compact, short, miniature, pocket-sized forms of cinematics that have existed from even before its standardization in theatrical form, and in recent years have multiplied and proliferated, taking up an increasingly important part of our everyday multimedia environment. Short films or micro-narratives, cinematic pieces or units re-assembled into image archives and looping themes, challenge the concepts that have traditionally been used to understand cinematic experience, like linear causality, sequentiality, and closure, and call attention to

complex and modular forms of cinematic expression and perception. Such forms, in turn, seem to meet the requirements of digital convergence, which has pushed the development of more compact and mobile hardware for the display and use of audiovisual content on laptops, smartphones, and tablets. Meanwhile, contemporary economies of digital content acquisition, filing, and sharing equally require the shrinking of cinematic content for it to be recorded, played, projected, distributed, and installed with ease and speed. In this process, cinematic experience is shortened and condensed as well, so as to fit the late-capitalist attention economy. The essays in this volume ask what this changed technical, socio-economic and political situation entails for the aesthetics and experience of contemporary cinematics, and call attention to different concepts, theories and tools at our disposal to analyze these changes.
