As a serial entrepreneur, Kevin Kruse has seen time and again that the leadership practices that actually work are the opposite of what is commonly taught and implemented. *Close Your Open Door Policy* shows how a contrarian approach can be a better, faster, and easier way to succeed as a leader. Chapter by chapter, Kruse focuses on a piece of popular wisdom, then shows with real-world case studies and quantitative research that the opposite approach will lead to better results, encouraging leaders to play favorites, stay out of meetings, and, of course, close their open doors.

The Myth of the Strong Leader

The former mayor of Charlottesville delivers a vivid, first-person chronicle of the terror and mayhem of the August 2017 "Unite the Right" event, and shows how issues of extremism are affecting not just one city but the nation itself. The deadly invasion of Charlottesville, Virginia, by white nationalist militias in August 2017 is a microcosm of the challenges facing American democracy today. In his first-person account of one of recent American history's most polarizing events, Michael Signer, then Charlottesville's mayor, both tells the story of what really happened and draws out its larger significance. Signer's gripping, strikingly candid "you are there" narrative sets the events on the ground-the lead-up to August's "Unite the Right" rally, the days of the weekend itself, the aftermath-in the larger context of a country struggling to find its way in a disruptive new era. He confronts some of the most challenging questions of our moment, namely how can we: Reconcile free speech with the need for public order? Maintain the values of pragmatism, compromise, even simple civility, in a time of intensification of extremes on the right and the left? Address systemic racism through our public spaces and memorials? Provide accountability after a crisis? While Signer shows how easily our communities can be taken hostage by forces intent on destroying democratic norms and institutions, he concludes with a stirring call for

optimism, revealing how the tragic events of Charlottesville are also bolstering American democracy from within.

The Children of Lincoln

Read this million-copy bestseller for leadership insights about top-down change to improve productivity in your business starting with the most important person: You. When Captain Abrashoff took over as commander of USS Benfold, it was like a business that had all the latest technology but only some of the productivity. Knowing that responsibility for improving performance rested with him, he realized he had to improve his own leadership skills before he could improve his ship. Within months, he created a crew of confident and inspired problem-solvers eager to take the initiative and responsibility for their actions. The slogan on board became "It's your ship," and Benfold was soon recognized far and wide as a model of naval efficiency. How did

Abrashoff do it? Against the backdrop of today's United States Navy, Abrashoff shares his secrets of successful management including: See the ship through the eyes of the crew: By soliciting a sailor's suggestions, Abrashoff drastically reduced tedious chores that provided little additional value.

Communicate, communicate, communicate: The more Abrashoff communicated the plan, the better the crew's performance. His crew eventually started calling him "Megaphone Mike," since they heard from him so often. Create discipline by focusing on purpose: Discipline skyrocketed when Abrashoff's crew believed that what they were doing was important. Listen aggressively: After learning that many sailors wanted to use the GI Bill, Abrashoff brought a test official aboard the ship-and held the SATs forty miles off the Iraqi coast. From achieving amazing cost savings to winning the highest gunnery score in the Pacific Fleet, Captain Abrashoff's extraordinary campaign sent shock waves through the U.S. Navy. It can help you change the course of your ship, no matter where your business battles are fought.

From one of the world's preeminent political historians, a magisterial study of political leadership around the world from the advent of parliamentary democracy to the age of Obama. All too frequently, leadership is reduced to a simple dichotomy: the strong versus the weak. Yet, there are myriad ways to exercise effective political leadership--as well as different ways to fail. We blame our leaders for economic downfalls and praise them for vital social reforms, but rarely do we question what makes some leaders successful while others falter. In this magisterial and wide-ranging survey of political leadership over the past hundred years, renowned Oxford politics professor Archie Brown challenges the widespread belief that strong leaders--meaning those who dominate their colleagues and the policy-making process--are the most successful and admirable. In reality, only a minority of political leaders will truly make a lasting difference. Though we tend to dismiss more collegial styles of leadership as weak, it is often the most cooperative leaders who have the greatest impact. Drawing on extensive research and decades of political analysis and experience, Brown illuminates the achievements, failures and foibles of a broad array of twentieth century politicians. Whether speaking of redefining leaders like Franklin Delano Roosevelt, Lyndon Johnson, and Margaret Thatcher, who expanded the limits of what was politically possible during their time in power, or the even rarer transformational leaders who played a decisive role in bringing about systemic change--Charles de Gaulle, Mikhail Gorbachev and Nelson Mandela, among them--Brown challenges our commonly held beliefs

Bookmark File PDF The Leader Who Had No Title Robin Sharma

about political efficacy and strength. Overturning many of our assumptions about the twentieth century's most important figures, Brown's conclusions are both original and enlightening. The Myth of the Strong Leader compels us to reassess the leaders who have shaped our world - and to reconsider how we should choose and evaluate those who will lead us into the future.

Forged in Crisis

How white advocates of emancipation abandoned African American causes in the dark days of Reconstruction, told through the stories of four Minnesotans White people, Frederick Douglass said in a speech in 1876, were “the children of Lincoln,” while black people were “at best his stepchildren.” Emancipation became the law of the land, and white champions of African Americans in the state were suddenly turning to other causes, regardless of the worsening circumstances of black Minnesotans. Through four of these “children of Lincoln” in Minnesota, William D. Green’s book brings to light a little known but critical chapter in the state’s history as it intersects with the broader account of race in America. In a narrative spanning the years of the Civil War and Reconstruction, the lives of these four Minnesotans mark the era’s most significant moments in the state, the Midwest, and the nation for the Republican Party, the Baptist church, women’s suffrage, and Native Americans. Morton Wilkinson, the state’s first Republican senator; Daniel Merrill, a St. Paul business leader who helped launch the first Black

Baptist church; Sarah Burger Stearns, founder and first president of the Minnesota Woman Suffragist Association; and Thomas Montgomery, an immigrant farmer who served in the Colored Regiments in the Civil War: each played a part in securing the rights of African Americans and each abandoned the fight as the forces of hatred and prejudice increasingly threatened those hard-won rights. Moving from early St. Paul and Fort Snelling to the Civil War and beyond, *The Children of Lincoln* reveals a pattern of racial paternalism, describing how even “enlightened” white Northerners, fatigued with the “Negro Problem,” would come to embrace policies that reinforced a notion of black inferiority. Together, their lives—so differently and deeply connected with nineteenth-century race relations—create a telling portrait of Minnesota as a microcosm of America during the tumultuous years of Reconstruction.

How did Alan Mulally--an outsider to the auto industry--lead such a spectacular turnaround at Ford? How did Morgan Stanley CEO John Mack keep his company from imploding even as Lehman Brothers collapsed? What is it that enables such extraordinary leaders to galvanize their talents and energy, as well as the talents and energy of those who work for them, to achieve superior performance no matter what challenges they face? Rajeev Peshawaria has spent more than twenty years working alongside top executives at Fortune 500 companies and training them in leadership, including as Global Director of Leadership Development programs at American Express, as Chief Learning Officer at both Morgan Stanley and Coca-Cola, and as one of the founding members of the renowned Goldman Sachs leadership

development program known as Pine Street. He knows precisely what makes the difference between those who are simply bosses and those who are superior leaders, and between those who continue to rise to the top levels and those who get stuck along the way. In this lively and remarkably empowering book, Peshawaria offers readers the opportunity to experience the highest level of leadership training available in the world. Introducing the three core principles he has observed are the foundation of the best leadership--that great leaders clearly define their purpose and values; that nobody can motivate another person because everyone comes premotivated; and that a leader's job is not to directly produce results but to create the conditions that will harness the energy of others—he details his unique and proven program for achieving leadership excellence. Sharing a wealth of illuminating stories, from those of Mulally's achievement at Ford and Mack's at Morgan Stanley, to how Harvey Golub and Ken Chenault successfully restored American Express to long-term sustainable growth, how Neville Isdell turned the Coca-Cola Company around, and the continuing prowess of Jeff Bezos in growing Amazon.com, he first reveals how extraordinary leaders marshal and sustain the level of energy in themselves that is required and how they enlist a core group of proficient co-leaders. He then outlines how to harness the energy and talents of those at all levels of an organization, igniting their motivation by following his RED guidelines for addressing their core needs concerning their Role, their work Environment, and their career Development. Finally, he introduces his unique Brains, Bones, and Nerves framework for:

Good to Great

The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How

can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership

required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

A Very Stable Genius

A WALL STREET JOURNAL BESTSELLER “Five gritty leaders whose extraordinary passion and perseverance changed history...a gripping read on a timeless and timely topic” —Angela Duckworth, #1 bestselling author of Grit An enthralling historical narrative filled with critical leadership insights, *Forged in Crisis*, by celebrated Harvard Business School historian Nancy Koehn, spotlights five masters of crisis: polar explorer Ernest Shackleton; President Abraham Lincoln; legendary abolitionist Frederick Douglass; Nazi-resisting clergyman Dietrich Bonhoeffer; and environmental crusader Rachel Carson. What do such disparate figures have in common? Why do their extraordinary stories continue to amaze and inspire? In delivering the answers to those questions, Nancy Koehn offers a remarkable template by which to judge those in our own time to whom the public has given its trust. She begins each of the book’s five sections by showing her protagonist on the precipice of a great crisis: Shackleton marooned on an Antarctic ice floe; Lincoln on the

verge of seeing the Union collapse; escaped slave Douglass facing possible capture; Bonhoeffer agonizing over how to counter absolute evil with faith; Carson racing against the cancer ravaging her in a bid to save the planet. The narrative then reaches back to each person's childhood and shows the individual growing—step by step—into the person he or she will ultimately become. Significantly, as we follow each leader's against-all-odds journey, we begin to glean an essential truth: leaders are not born but made. In a book dense with epiphanies, the most galvanizing one may be that the power to lead courageously resides in each of us. Whether it's read as a repository of great insight or as exceptionally rendered human drama, *Forged in Crisis* stands as a towering achievement.

On Success

A leader's singular job is to get results. But even with all the leadership training programs and "expert" advice available, effective leadership still eludes many people and organizations. One reason, says Daniel Goleman, is that such experts offer advice based on inference, experience, and instinct, not on quantitative data. Now, drawing on research of more than 3,000 executives, Goleman explores which precise leadership behaviors yield positive results. He outlines six distinct leadership styles, each one springing from different components of emotional intelligence. Each style has a distinct effect on the working atmosphere of a company, division, or team, and, in turn, on its financial performance. Coercive leaders demand immediate compliance. Authoritative leaders mobilize people toward a vision. Affiliative leaders create emotional bonds and harmony. Democratic leaders build consensus through

participation. Pacesetter leaders expect excellence and self-direction. And coaching leaders develop people for the future. The research indicates that leaders who get the best results don't rely on just one leadership style; they use most of the styles in any given week. Goleman details the types of business situations each style is best suited for, and he explains how leaders who lack one or more of these styles can expand their repertoires. He maintains that with practice leaders can switch among leadership styles to produce powerful results, thus turning the art of leadership into a science. Family Wisdom from the Monk Who Sold His Ferrari

The behind-the-scenes story of the rise and reign of the world's strangest and most elusive tyrant, Kim Jong Un, by the journalist with the best connections and insights into the bizarrely dangerous world of North Korea. Since his birth in 1984, Kim Jong Un has been swaddled in myth and propaganda, from the plainly silly--he could supposedly drive a car at the age of three--to the grimly bloody stories of family members who perished at his command. Anna Fifield reconstructs Kim's past and present with exclusive

access to sources near him and brings her unique understanding to explain the dynastic mission of the Kim family in North Korea. The archaic notion of despotic family rule matches the almost medieval hardship the country has suffered under the Kims. Few people thought that a young, untested, unhealthy, Swiss-educated basketball fanatic could hold together a country that should have fallen apart years ago. But Kim Jong Un has not just survived, he has thrived, abetted by the approval of Donald Trump and diplomacy's weirdest bromance. Skeptical yet insightful, Fifield creates a captivating portrait of the oddest and most secretive political regime in the world--one that is isolated yet internationally relevant, bankrupt yet in possession of nuclear weapons--and its ruler, the self-proclaimed Beloved and Respected Leader, Kim Jong Un.

MegaLiving: 30 Days To A Perfect Life

Washington Post national investigative reporter Carol Leonnig and White House bureau chief Philip Rucker, both Pulitzer Prize winners, provide the definitive insider narrative of Donald Trump's unique presidency with shocking new reporting and insight into its implications. "I alone can fix it." So went Donald J. Trump's march to the presidency on July 21, 2016, when he accepted the Republican presidential nomination in Cleveland, promising to restore what he described as a fallen nation. Yet over the subsequent years, as he has undertaken the actual work of the commander in chief, it has been hard to see beyond the daily chaos of scandal, investigation, and constant

bluster. It would be all too easy to mistake Trump's first term for one of pure and uninhibited chaos, but there were patterns to his behavior and that of his associates. The universal value of the Trump administration is loyalty - not to the country, but to the president himself - and Trump's North Star has been the perpetuation of his own power, even when it meant imperiling our shaky and mistrustful democracy. Leonnig and Rucker, with deep and unmatched sources throughout Washington, D.C., tell of rages and frenzies but also moments of courage and perseverance. Relying on scores of exclusive new interviews with some of the most senior members of the Trump administration and other firsthand witnesses, the authors reveal the forty-fifth president up close, taking readers inside Robert Mueller's Russia investigation as well as the president's own hap-hazard but ultimately successful legal defense. Here for the first time certain officials who have felt honor-bound not to publicly criticize a sitting president or to divulge what they witnessed in a position of trust tell the truth for the benefit of history. This peerless and gripping narrative reveals President Trump at his most unvarnished and exposes how decision making in his administration has been driven by a reflexive logic of self-preservation and self-aggrandizement - but a logic nonetheless. This is the story of how an unparalleled president has scrambled to survive and tested the strength of America's democracy and its common heart as a nation.

you're about to walk on, and just go into it with the curiosity of a child, knowing that you'll come out on the other side as a new person, or to be more accurate, far more of the person who you truly are and have been created to be." Jack Valentine seemed to have it all. He made good money as an adman, and looked good doing it. He had a hot apartment, cool friends, even a slick car—at least until the hectic Monday morning a truck smashed into it, sending the critically injured Jack to the hospital. Everything happens for a reason, though, and Jack's reason reveals itself in the silver-haired cancer patient who becomes his roommate one evening. The elderly man, Cal, shares his life story—one not dissimilar to Jack's—of material wealth masking a gaping hole within. Cal ultimately found salvation through philosophy ("the love of wisdom"), and now offers to help Jack by prepping the younger man for the Final Questions we all must face: Have I lived wisely? Have I loved well? Have I served greatly? Presenting Jack with three plane tickets, each accompanied by a map marked with a red X, Cal sends Jack to meet with three great teachers, each of whom will help Jack answer one of the Final Questions—just as they once helped Cal. First, in Rome, Jack will meet "the Saint." Then a haunted beach in Hawaii introduces him to "the Surfer." And finally the grandeur of New York City sets the stage for his last encounter: with "the CEO." Along the way, Jack will learn to do his interior work, discover that our negative traits offer gateways to higher versions of ourselves, and understand that figuring things out in your head can distract you from the powerful whispers of your heart. Join Jack on his journey and step into the you that you were always

Things Fall Apart

A gripping, behind-the-scenes portrait of the rise of Saudi Arabia's secretive and mercurial new ruler "A rare and penetrating look behind the curtain of the world's most important family and its dangerous new leader."—Lawrence Wright, author of *The Looming Tower* MBS is the untold story of how a mysterious young prince emerged from Saudi Arabia's sprawling royal family to overhaul the economy and society of the richest country in the Middle East—and gather as much power as possible into his own hands. Since his father, King Salman, ascended to the throne in 2015, Mohammed bin Salman has leveraged his influence to restructure the kingdom's economy, loosen its strict Islamic social codes, and confront its enemies around the region, especially Iran. That vision won him fans at home and on Wall Street, in Silicon Valley, in Hollywood, and at the White House, where President

Trump embraced the prince as a key player in his own vision for the Middle East. But over time, the sheen of the visionary young reformer has become tarnished, leaving many struggling to determine whether MBS is in fact a rising dictator whose inexperience and rash decisions are destabilizing the world's most volatile region. Based on years of reporting and hundreds of interviews, MBS reveals the machinations behind the kingdom's catastrophic military intervention in Yemen, the bizarre detention of princes and businessmen in the Riyadh Ritz-Carlton, and the shifting Saudi relationships with Israel and the United States. And finally, it sheds new light on the greatest scandal of the young autocrat's rise: the brutal killing of journalist Jamal Khashoggi by Saudi agents in Istanbul, a crime that shook Saudi Arabia's relationship with Washington and left the world wondering whether MBS could get away with murder. MBS is a riveting, eye-opening account of how the young prince has wielded vast powers to reshape his kingdom and the world around him.

Life Lessons from the Monk Who Sold His Ferrari

#1 NEW YORK TIMES BESTSELLER • A grand vision defined: The CEO of Disney, one of Time's most influential people of 2019, shares the ideas and values he embraced to reinvent one of the most beloved companies in the world and inspire the people who bring the magic to life. Robert Iger became CEO of The Walt Disney Company in 2005, during a difficult time. Competition was more intense

than ever and technology was changing faster than at any time in the company's history. His vision came down to three clear ideas: Recommit to the concept that quality matters, embrace technology instead of fighting it, and think bigger—think global—and turn Disney into a stronger brand in international markets. Twelve years later, Disney is the largest, most respected media company in the world, counting Pixar, Marvel, Lucasfilm, and 21st Century Fox among its properties. Its value is nearly five times what it was when Iger took over, and he is recognized as one of the most innovative and successful CEOs of our era. In *The Ride of a Lifetime*, Robert Iger shares the lessons he's learned while running Disney and leading its 200,000 employees, and he explores the principles that are necessary for true leadership, including:

- Optimism. Even in the face of difficulty, an optimistic leader will find the path toward the best possible outcome and focus on that, rather than give in to pessimism and blaming.
- Courage. Leaders have to be willing to take risks and place big bets. Fear of failure destroys creativity.
- Decisiveness. All decisions, no matter how difficult, can be made on a timely basis. Indecisiveness is both wasteful and destructive to morale.
- Fairness. Treat people decently, with empathy, and be accessible to them.

This book is about the relentless curiosity that has driven Iger for forty-five years, since the day he started as the lowliest studio grunt at ABC. It's also about thoughtfulness and respect, and a decency-over-dollars approach that has become the bedrock of every project and partnership Iger pursues, from a deep friendship with Steve Jobs in his final years to an abiding love of the *Star Wars* mythology. in this book strike me as universal” Iger writes. “Not just to the aspiring CEOs of the world, but to anyone wanting to feel less fearful, more confidently themselves, as they navigate their professional and even personal lives.”

My Share of the Task

The definitive work on Stalin's purges, the author's *The Great Terror* was universally acclaimed when it first appeared in 1968. It was "hailed as the only scrupulous, nonpartisan, and adequate book on the subject". And in recent years it has received equally high praise in the Soviet Union, where it is now considered the authority on the period, and has been serialized in *Neva*, one of their leading periodicals. Of course, when the author wrote the original volume two decades ago, he relied heavily on unofficial sources. Now, with the advent of glasnost, an avalanche of new material is available, and he has mined this enormous cache to write a substantially new edition of his classic work. It is remarkable how many of the most disturbing conclusions have born up under the light of fresh evidence. But the author has added enormously to the detail, including hitherto secret information on the three great "Moscow Trials,"

on the fate of the executed generals, on the methods of obtaining confessions, on the purge of writers and other members of the intelligentsia, on life in the labor camps, and many other key matters. Both a leading Sovietologist and a highly respected poet, the author blends research with prose, providing not only an authoritative account of Stalin's purges, but also a compelling chronicle of one of this century's most tragic events. A timely revision of a book long out of print, this is the updated version of the author's original work.
