He makes me confident that not only will I make weight, but I will also perform at my peak performance. He has helped with my day-to-day nutrition in and out of fight camps, my weight-cut protocol, and my rehydration program for after weigh-ins, which to me are the most important. Chris doesn't only tell you what to eat and when to eat it, but he also breaks down how every person's body is different and reacts to certain foods different and he explains why I should eat certain foods and why eating them at a specific time is so important. Having him on my team absolutely gave me a tremendous advantage over my competition. I wouldn't trust anyone else with my diet." - Ryan LaFlare, retired UFC fighter "I've been an athlete my entire life, but nutrition has always overwhelmed

me. We live in a culture of fad diets. Consumers are taught to believe you need to starve in order to lose weight. As a result, the public, like me, gets overwhelmed and discouraged. We tend to starve ourselves to lose weight, and when we can't take it anymore, we binge. Chris's book has made it finally possible for me to break that cycle. I realize eating healthy doesn't mean I have to be hungry. It doesn't have to be boring. Not only do I notice a difference in my physical appearance, but the difference in my mood is also amazing. I can think clearer and feel generally happier just by finally finding a way to maintain healthy eating habits. I think this book serves value to not only those competing but also to anyone looking to make positive changes in their health!" - Sarah Thomas, 2018 New York Golden Gloves winner "Having known Chris and seeing the way he eats for a few years now, I've seen with my own eyes the superhuman capabilities it gives someone when they get their nutrition on point. I absolutely love that he's not only finally sharing a taste of his secret recipes but also a ton of educational content so one can make it relevant to their own lifestyle and delivered using a system that seems very simple to implement." - Avril Mathie, professional boxer and Miss Swimsuit USA International 2015

If you want to build muscle and lose fat easily, effectively, and rapidly...and if you'd like to rid yourself of all kinds of bad advice and habits that are making getting into great shape much harder than it should be...then you need to read this book. Let me ask you a question. Do any of the following claims sound familiar? "I have bad genetics--I just can't build muscle or lose fat easily." "You have to work your abs more to get a six-pack." "When doing cardio, you want your heart rate in the 'fat burning zone.'" "Don't eat carbohydrates--they make you fat." "Don't eat at night if you want to lose weight." "If you wait too long in between meals, your body goes into 'starvation mode' and you will mess up your metabolism." "I'm overweight because I have a slow metabolism." You've probably heard one or more of these statements before, and the sad truth is lies like these have ruined many people's fitness ambitions. Thanks to the overwhelming amount of fitness pseudo-science and lies being pushed on us every day by bogus magazines and self-styled "gurus," it's becoming harder and harder to get in shape. Muscle Myths was written to debunk the most commonplace and harmful gimmicks, fads, myths, and misinformation in the health and fitness industry. And unlike other books that just offer endless opinions, the advice in this book is backed up by over 300 citations of scientific literature, and real-world results. Make no mistake: this isn't a book about exercise and diet theory. This book is full of practical, results-driven advice that will help you reach your fitness goals easier and faster. Here are just

some of the things you'll learn in this book: Why you don't have to completely cut out carbs or fat, or eat weird combinations of food to lose weight. The truth about supplements and why 99% of them are a complete waste of money (and the few that are actually scientifically proven to work). The truth about the effects of fasting and the "starvation mode" myth. Yup, it's a myth, and you may even want to incorporate some fasting into your meal schedule. Why eating a substantial amount of carbohydrates every day won't make you fat as some "experts" claim, but why going low-carb can be beneficial for some. The scientific secrets of getting a six-pack. Forget 6-minute gimmicks, doing endless crunches, and hours of grueling cardio--it's actually pretty easy when you know what you're doing. Training and diet methods that will completely shatter any perceived "genetic barriers" that you think are holding you back from building muscle or losing weight. What you need to know about alcohol and its effects on your fat loss and muscle growth. (Hint: It's not nearly as bad as some people claim, and you don't have to totally abstain if you know what you're doing!) And much more. This book will save you the money, time, and frustration of falling into the traps of misleading diets, workout programs, and products, and teach you how to finally start seeing real results with your diet and exercise. **SPECIAL BONUS FOR READERS!** With this book you'll also get a free 52-page bonus report from the author called "Muscle Meals: 15 Recipes for Building Muscle, Getting Lean, and Staying Healthy."
